**CRANE- National Vendors**

This machine has been engineered to our own rigid safety and performance standards. It has been designed to comply with sanitation and health guidelines recommended by the Automatic Merchandising Health-Industry Council (AMHIC) and it conforms with all other NAMA safety recommendations.

This machine has been manufactured in accordance with the safety standards of both Underwriter's Laboratories and the Canadian Standards Association. To maintain this degree of safety and to continue to achieve the level of performance built into this machine, it is important that installation and maintenance be performed so as to not alter the original construction or wiring and that replacement parts are as specified in the Parts and Service Manual. Your investment in this equipment will be protected by using this Operator's Guide and the Parts and Service Manual in your operation, service and maintenance work. By following prescribed procedures, machine performance and safety will be preserved.

**NOTE**

THE INSTRUCTIONS FOR INSTALLING AND OPERATING THIS MERCHANDISER ARE CONTAINED IN THE FOLLOWING MANUALS:

Mechanical Set-Up, Operation, and Maintenance Manual  
Part Number 1470058

Programming Guide  
Part Number 1470066

DETAILED PART INFORMATION IS CONTAINED IN THE FOLLOWING MANUAL:

Parts Manual  
Part Number 1470060

**THE PROCEDURES IN THIS PROGRAMMING GUIDE  
ARE FOR USE WITH THE FOLLOWING SOFTWARE  
VERSIONS:**

<b>If the language on your screen is:</b>	<b>Your software version is:</b>
English	RCE-4
German	RCG-5
French	RCF-3
Mexican Spanish	RCM-4
European Spanish	RCS-4

Complete the Software version retrieval procedure on page 114 of this PROGRAMMING GUIDE.

The version number/numbers in the display should be the same as the version number listed above.

If the version number in the display is NOT the same as the version number listed above, contact National Vendors' Service Department at 1-800-325-8811.

**SOFTWARE COVERED BY THIS PROGRAMMING GUIDE**

## PROGRAMMING THE SNACK CENTER

The programming procedures are divided up between ten **FUNCTIONS** which correspond to the function keys on the maintenance keypad (see figure 1). The function keys are all the keys except

and the arrow keys.

The **PROGRAMMING DIRECTORY** lists those functions, along with all of the procedures you can do by pressing the appropriate key. Each procedure has a number that directs you to a specific table. Once you find the exact task you need to do, go to that table. Each table is a step-by-step guide which tells you which keys to press, what the displays look like, and what they mean.

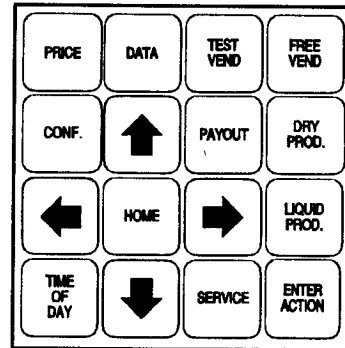

Figure 1. Maintenance Keypad

### AN EXAMPLE:

Let's say you want to set prices. Looking in the programming directory under **PRICE**, you will see several choices. If you're going to set all of the selections in one tray to one price, perform procedure P1-2. Do what it says in the **ENTER THIS KEYSTROKE...** column. Once you do that, the display should look just like the one in the **AND THE DISPLAY INDICATES** column. If there is some information you need to know, you can find it in the **COMMENTS** column. So now we'll take you through it step by step.

1. Press . The display shows *PRICE*, meaning that you have entered the price-setting mode.
2. Press . The display shows *SELECT LVL*, meaning that you can now select which level of pricing you want to do.
3. Press . The display shows *TRAY LVL*. (This just happens to be the level you want, so you don't have to press the key any more.)
4. Press . The display looks something like the one shown in the column, except the T is replaced by a tray ID, and the X's are replaced by the currently set price for that tray. The **COMMENTS** column tells you all you need to know about these codes. Step 4 gives you a couple of options. If you want to price the tray shown in the display, go ahead to step 5. If you want to price another tray, press its ID letter on the selection switch panel, then go to step 5. For our example, push C.
5. Enter the price for this tray. If you want all the selections in tray C to be \$0.55, push 55 on the selection switch panel.

6. Now you have two more **OPTIONS**. If you are happy with the price you have selected for tray C, press . That price is now locked in, and replaces all other prices.

The other option you have is to **CONTINUE**, which opens up a few more choices. You can quit and go home by closing the monetary door. Or, you can do something else. There are plenty of other things to do, and they are all covered in the programming tables. The **AND THE DISPLAY INDICATES** column in the programming tables shows that the display **READY** appears after you exit a programming procedure. Your machine probably won't actually say **READY!** This is just a way to indicate the standby, custom, or other messages that normally occur when the machine is in the vending mode.

## Special Keys and Shortcuts

As mentioned before, the function keys allow access to the ten functions. The arrow and **HOME** keys are used to move around between and within the functions. No matter where

you are inside a function, pressing  one time brings you to the beginning of that

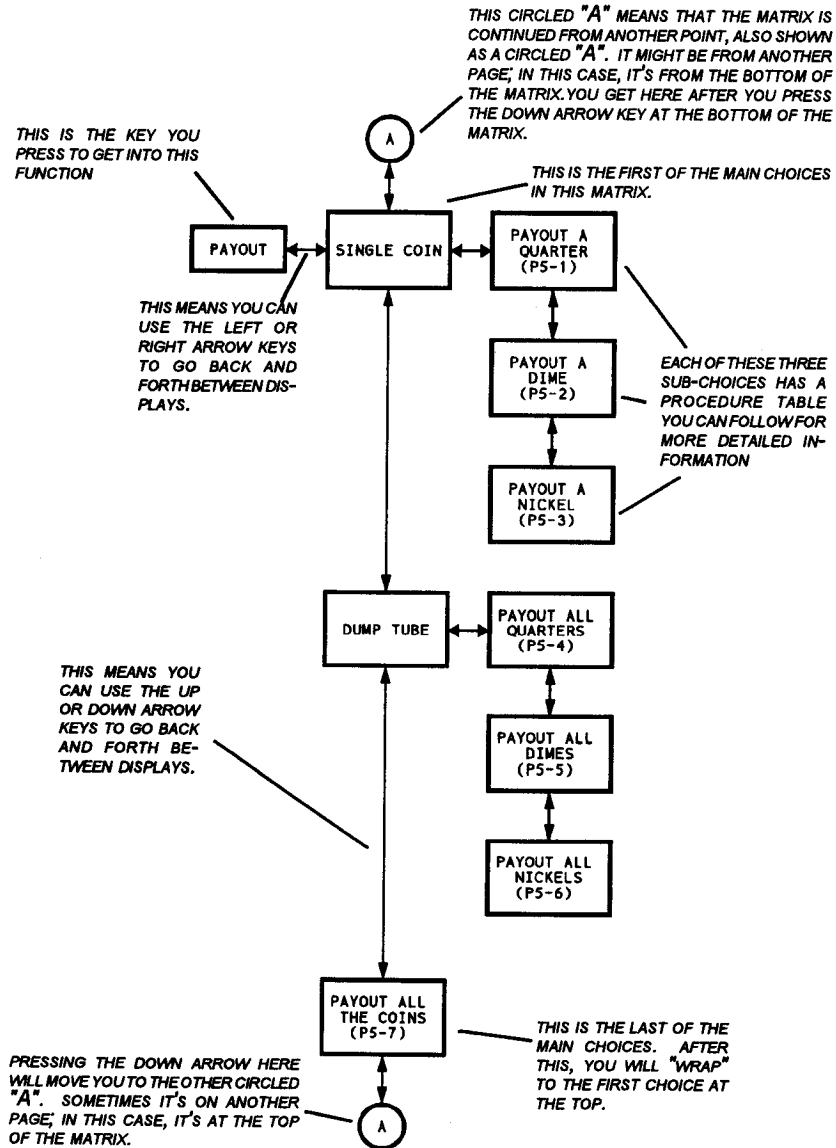

function. Pressing  a second time takes you back to the standby message. This is

a good "escape button" in case you can't find your way back out of a function. The arrow keys will let you move around inside a function. You will find out more about this when we

talk about **MATRIXES**.  is the key you press when you want to initiate an action or step through lists of choices.

# THE MATRIX

We can start putting together all the things you've learned into a method to get around the programming procedures a little easier. You know how to find the detailed procedures in the tables, and how to start into and end them. After you get more familiar with some of the functions you might not want to work through those tables all the time, because you pretty well know what to do. This is when you can use the **MATRIXES**. Each matrix is a picture of the various tasks you can do within a function. Let's take a look at the **PAYOUT** matrix and find out what it's all about.

Think of a matrix as a house with a lot of rooms, each represented by a box. The double arrows between the boxes are like the hallways in the house. You know you can go back and forth between two rooms in a house by using the hallways. Likewise, you can go back and forth between the boxes by using the up, down, left, and right arrow keys. As we said earlier, if you get lost in the house, you can get to the "front door" by pressing . If you're

really lost, or want to get out fast, press  twice. This will take you directly to the standby message. To access a function directly, even from the middle of another function, press the appropriate key. Once you had finished setting tray prices in the earlier example, you could go directly to the CONFIGURE or TIME OF DAY function just by pressing that key.

FUNCTION	IF YOU WANT TO...		COMPLETE THIS PROCEDURE	ON THIS PAGE	
CODE	Access all functions		P0-1	25	
	Assign a new master user code		P0-3	28	
PRINTER	Set up the optional printer		P0-2	26

Notes

# Notes

A series of horizontal lines for writing notes, spanning most of the page width. There are approximately 25 lines in total, with a thicker line at the bottom separating the notes area from the footer.

**Access All Functions, Including Those Reserved For The Supervisor**

STEP	ENTER THIS KEYSTROKE...	AND THE DISPLAY INDICATES	COMMENTS
1			
2		CODE	
3		ENTER CODE	
4	Enter your four-digit Master User Code.	XXXX	The master code you have just entered is displayed.
5		UNLOCKED Is shown briefly, and then CODE is shown in the display	You may now access all of the programming functions included in the software for this merchandiser.
6	CONTINUE		Follow the procedures in the Programming section of this manual.

**P0-2 - Connecting The Optional Printer**

An optional printer is available for recording price and data information, as shown in the display.

1. Locate the printer connector inside the machine.
2. Plug the connector into the receptacle in the front of your printer.
3. Turn the printer ON.
4. Follow the steps in the table on the next page.

Figure P0-2

Print The Data List Or The Price List

STEP	ENTER THIS KEYSTROKE...	AND THE DISPLAY INDICATES	COMMENTS
1		SET TIME	
2		PRINTER XYZ	Where XX = baud rate: 12 = 1200 baud 24 = 2400 baud 48 = 4800 baud 96 = 9600 baud  Y = Printer busy: 0 = 0 signal 1 = + signal  Z = Which level of data to print 0 = Tray level 1 = Selection level
3	Appropriate selection switch panel keys	The display changes	See note 1.
4	OPTIONS		The data list will print on the printer and be displayed on the screen at the same time. See note 2.
			The price list will print on the printer and be displayed on the screen at the same time. See note 2.

Note 1 Step 3 only works while PRINTER X is displayed. If printer mode is not selected, normal data and price lists will show on the display.

Note 2 If the machine "locks up", interrupt machine power and change the printer busy code (step 2).

Assign A New Code For Identifying The Master User

STEP	ENTER THIS KEYSTROKE...	AND THE DISPLAY INDICATES	COMMENTS
1			
2		<i>CODE</i>	
3		<i>ENTER CODE</i>	
4	Enter your four-digit Master User Code	<i>XXXX</i>	The master code you have just entered is displayed.
5		<i>UNLOCKED</i> is shown briefly, and then <i>CODE</i> is shown in the display.	You may now access all of the programming functions included in the software for this merchandiser.
6		<i>ENTER CODE</i>	
7		<i>NEW CODE</i>	
8	Enter a new four-digit code	<i>XXXX</i>	<i>XXXX</i> is the code you wish to use in the future.
9		<i>CODE</i>	The new code is in effect.
10	CONTINUE		Follow the procedures in the Programming section of this manual.

Setting Water Time And Test Throwing

STEP	ENTER THIS KEYSTROKE...	AND THE DISPLAY INDICATES	COMMENTS
1		<i>WATER</i>	The water timing procedures can now be accessed.
2		<i>WTR1 XX.XX</i>	XX.XX = the water time for the brewed selection. The brewed selection could be COFFEE, DECAF, or TEA.
3	 To display the water time for the next selection.	<b>O P T I O N S</b> ADDITIONAL SELECTIONS: <i>WTR2 XX.XX</i>	XX.XX Water time for the non-brewed selection in a Fresh Brew machine.
4	Enter a new water time for the selection using the selection switch panel.		
	 To initiate a water test throw for this selection.		
	Go to step 5.		
5	Repeat step 3 and step 4 to set or test another water time.		
	<b>O P T I O N S</b>  CONTINUE	<i>READY</i>	Options: 1. Close monetary door. 2. Press another function switch. 3. See advanced programming section for other options.

Dry Ingredient Time Setting and Test Throwing

4		PRICE .XX	The price of the selection is repeated. You must deposit more money to make your total credit equal to or greater than the price in the display.
5	Deposit additional coins and/or currency to establish at least the correct amount of credit.	CREDIT .XX	XX is the total credit established. The selection is vended, change due is returned, and credit is returned.
6	CONTINUE	READY	Options: 1. Close monetary door. 2. Press another function switch. 3. See advanced programming section for other options.

The EURODRINK Merchandiser is warranted for one (1) year against defective parts and workmanship. Any part or parts which are proven to be defective within one (1) year of the date of shipment will be repaired or replaced free of charge when the defective part is returned, with transportation charges prepaid, to the destination designated by the National Vendors Warranty Department.

This warranty applies only to the original purchaser of the Merchandiser and is null and void if the Merchandiser is sold during the period of warranty.

This warranty does not apply to a) electrical components, wiring, or circuits and/or for all mechanical parts or assemblies damaged as a result of operating the Merchandiser at other than the design voltage and frequency specified on the Electrical Rating Tag, or b) in event of vandalism, fire or negligence, or c) incandescent lamps, neon lamps, fluorescent lamps, ballasts, starters or other expendable items or d) when other manufactured components are installed in National Vendors Merchandisers.

National Vendors is not responsible for any cost of service rendered or repairs made by customer or its agents on Merchandiser or parts unless authorization to incur such expense has been given in writing by National Vendors prior to incurring such expense.

THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES EXPRESSED OR IMPLIED, INCLUDING WITHOUT LIMITATION, WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. NATIONAL VENDORS SHALL NOT BE RESPONSIBLE FOR CONSEQUENTIAL OR PUNITIVE DAMAGES. National Vendors neither assumes nor authorizes any person to assume for it any obligation or liability in connection with the sale of said equipment or any part thereof.
