This machine has been engineered to our own rigid safety and performance standards. It has been designed to comply with sanitation and health guidelines recommended by the Automatic Merchandising Health-Industry Council (AMHIC) and it conforms with all other NAMA safety recommendations.

This machine has been manufactured in accordance with the safety standards of both Underwriter’s Laboratories and the Canadian Standards Association. To maintain this degree of safety and to continue to achieve the level of performance built into this machine, it is important that installation and maintenance be performed so as to not alter the original construction or wiring and that replacement parts are as specified in the Parts and Service Manual. Your investment in this equipment will be protected by using this Operator’s Guide and the Parts and Service Manual in your operation, service and maintenance work. By following prescribed procedures, machine performance and safety will be preserved.
# TABLE OF CONTENTS

Specifications ................................................................. iv  
Major Parts ................................................................. vi  
Controls and Indicators ................................................ x  

## I. LOCATION PREPARATION ........................................... 1  
   Electrical Power Requirements ..................................... 1  
   Water Requirements .................................................... 2  

## II. POSITIONING THE MERCHANDISER ............................... 3  

## III. CONNECTING EVERYTHING ......................................... 3  
   Connect the Merchandiser to the Water Supply .................. 3  
   Connect the Merchandiser to the Electrical Power Supply ....... 3  

## IV. FINAL MECHANICAL PREPARATION ............................... 4  
1. Level the Merchandiser ................................................ 4  
2. Mount the Base Plate ................................................... 5  
3. Install the Water Filter Cartridge .................................... 6  
4. Load the Optional Filter Paper ....................................... 9  
5. Install the Optional Coin Box Lock ................................. 11  
6. Set Up and Load the Coin Mechanism ............................. 12  
7. Fill the Tank ................................................................ 14  
8. Fill the Canisters ....................................................... 14  
9. Load Cups .................................................................... 15  
10. Tell the Machine About the Cup Sizes ......................... 15  
11. Test the Machine ...................................................... 17  

## V. ADJUSTMENTS AND MINOR MAINTENANCE .................... 18  
1. Empty the Bill Stacker ............................................... 18  
2. Adjust the Water Valves .............................................. 18  
3. Adjust the Air Pressure ............................................... 19  
4. Install Canisters ....................................................... 19  
5. Adjust the Cup Mechanism .......................................... 20  
6. Set Up the Menu Assembly ......................................... 21

### SPECIFICATIONS

#### DIMENSIONS
- 72" (183 cm) high
- 32" (81 cm) wide
- 28.5" (72 cm) deep

#### WEIGHT
- 475 lbs (215.5 kg)

#### WATER REQUIREMENTS
- Minimum: 20 psi (137.8 kPa)
- Maximum: 80 psi (551.2 kPa)

#### AMBIENT TEMPERATURE
- Minimum: 41° F (5° C)
- Maximum: 90° F (32° C)

#### OPERATING ENVIRONMENT
- For indoor use only

#### CUP CAPACITIES (APPROXIMATE)
- 5 oz cups - 840
- 7 oz cups (squat) - 700
- 8.25 oz cups - 640
- 9 oz cups (squat) - 670
- 10 oz cups - 600
- 12 oz cups - 575

#### CANISTER CAPACITIES (APPROXIMATE)
- Fresh brew coffee - 13 lbs (Model 634 only)
- Freeze dry coffee - 2 lbs
- Fresh brew decaf - 9 lbs (Model 634 only)
- Freeze dry decaf - 2 lbs
- Tea (freeze dry) 1.5 lbs
- Chocolate - 10 lbs
- Soup (or sugar substitute) - 6.7 lbs (4 lbs)
- Sugar - 11 lbs
- Lightener - 4.5 lbs

### PRODUCT OPTIONS

#### Model 634 Fresh Brew
- Standard Configuration:
  - Fresh brew coffee (pre-ground)
  - Fresh brew OR freeze dry decaf
  - Freeze dry tea
  - Espresso, cappuccino, hot chocolate, and "cup only" selections
- Optional Configurations:
  - Hot water selection
  - Soup selection
  - OR
  - Sugar substitute condiment

#### Model 636 Freeze Dried
- Standard Configuration:
  - Freeze dry coffee
  - Freeze dry decaf
  - Freeze dry tea
  - Espresso, cappuccino, hot chocolate, and "cup only" selections
- Optional Configurations:
  - Hot water selection
  - Soup selection
  - OR
  - Sugar substitute condiment

CONTROLS AND INDICATORS

POWER PANEL. You may have one of three power panels, depending upon where you live. The controls are fundamentally the same, however.

Circuit Breakers. Circuit breakers protect the merchandiser against failures in the power supply or any of the electrical components. If a circuit breaker trips and cannot be reset, consult your troubleshooting manual.

Back Side of U.S./Canada Power Control Panel. The circuit board mounted on the rear of the U.S. and Canadian power control panel is a dc power supply for the coin mechanism. A fuse protects the board circuitry in the event of a coin mechanism solenoid failure. If the coin mechanism is not working, check this fuse. If the fuse is blown, a bad coin mechanism solenoid could be at fault.

Main Power Switch. This is the main ON/OFF switch for the merchandiser.

WARNING

To protect against electrical shocks and possible damage to the machine, turn this switch OFF when performing any maintenance on the merchandiser.

LABEL
MAIN POWER SWITCH
ELECTRONICS CIRCUIT BREAKER
MOUNTING STUDS
FOR MEXICO ONLY
Main Controller PCB Display. This display consists of two light emitting diodes (LED) mounted on the controller PCB.

**POWER ON (LED 1)**
When lit, this red LED indicates electrical power is applied to the controller PCB.

**HEARTBEAT (LED 2)**
When flashing, this red LED indicates that the controller PCB is active, and the software is operating.

**NORMAL CONDITIONS:**
When the merchandiser is operating normally, you should see a steady red **POWER ON** indicator. The red **HEARTBEAT** indicator should be flashing with a balanced on/off pattern (on for the same length of time that it is off).

**ERROR CONDITIONS:**
If an error is present, the red **HEARTBEAT** indicator will flash with an unbalanced on/off pattern (on longer than it is off). The error(s) can be viewed under the DIAGNOSTICS mode.

SELECTION SWITCH
MONETARY PANEL
**High Voltage Interlock Switch (U.S./Canada).** When the cabinet door is open, this switch turns off the optional fan and bean light (if equipped), and turns on the service light.

**High Voltage Interlock Switch (International).** When the cabinet door is open, this switch turns off all high voltage to the cabinet. Pulling the switch out restores high voltage for maintenance purposes.

**Low Voltage Door Switch.** Informs the controller software of the main door open or closed status.

**Message Display.** This is how the merchandiser communicates with the outside world. Customers can see messages about how much money they have put into the merchandiser. The message display also tells customers when a selection is sold out and when vending is free, inhibited, or discounted. The message display shows you what you are doing when you program the merchandiser, and can show you what is wrong if there is a failure.

**Free Vend Keyswitch.** This allows someone (other than maintenance people) to set the merchandiser to free vend without opening the door.

**Selection Switch Panel.** The customer uses these switches to make selections. Also, maintenance people may use this switch panel during programming and other support modes.

**Coin Return Button.** Pressing this button returns any coins that have been paid into the merchandiser prior to a vend.

**Bill Acceptor (Optional).** Accepts bills in various denominations, depending upon the type of bill validator, and how the machine is configured.

**Service Keypad.** The service keypad is located at the top of the monetary panel. It gives service personnel the means to program, retrieve data from, and view diagnostic information about, the merchandiser.
INITIAL SET-UP

I. LOCATION PREPARATION

After your machine is unpacked and placed near its permanent location, you need to make sure you have the proper electrical and water service.

ELECTRICAL POWER REQUIREMENTS

This merchandiser needs electrical power as shown in the following table. NOTE: Each merchandiser should have its own electrical circuit.

<table>
<thead>
<tr>
<th>Country</th>
<th>Volts</th>
<th>Frequency (Hz)</th>
<th>Current (Amps)</th>
</tr>
</thead>

1. Check the Power Outlet

This merchandiser is supplied with a service cord for the country of use and is terminated in a grounding type plug. The wall receptacle used for this merchandiser must be properly polarized, grounded, and of the correct voltage. Operating the merchandiser from a source of low voltage will VOID YOUR WARRANTY. Each merchandiser should have its own electrical circuit and that circuit should be protected with a circuit breaker or fuse conforming to local regulations.

- **Voltage Check** - Place the leads of a voltmeter across the LINE (LIVE) and NEUTRAL terminals of the wall receptacle. The voltmeter should indicate 110-130 volts ac for 120 volt, 60 Hz locations, or 220-240 volts ac for 230 volt, 50 Hz locations.

- **Polarity Check** - Place the leads of a voltmeter across the LINE (LIVE) and GROUND terminals of the wall receptacle. The voltmeter should indicate 110-130 volts ac for 120 volt, 60 Hz locations, or 220-240 volts ac for 230 volt, 50 Hz locations.

- **Noise Potential Check** - Place the leads of a voltmeter across the NEUTRAL and GROUND terminals of the wall receptacle. The voltmeter should indicate 0 volts ac. A measurement greater than 1.5-2.0 volts ac could result in problems for the merchandiser's electronic circuitry caused by electrical noise.

Any deviation from these requirements could result in unreliable performance from your merchandiser.
WATER REQUIREMENTS

The best type of water for coffee brewing is normal hard (tap) water. If your location has chemically softened water, you should do one of the following things:

• Have a non-softened supply line run to the merchandiser
• Contact your local water filter supplier for information and suggestions

Well water can also be used in the EuroDrink Machine. However, you should have it checked for levels of carbonates and alkalies. Contact your water filter supplier if these values are relatively high.

What is the Water Pressure at Your Location?

It should be no less than: 10 psi (69.0 KPa) at 1/2 gallon/minute
And no more than: 80 psi (522.0 KPa) at 1/2 gallon/minute

If you’re not sure about the pressure and flow rate, check with your water company.

What to do With the Water Supply Line:

Locate the supply line at the rear of your merchandiser.
Equip the line with a shut-off valve.

Flush the water supply line before connecting it to the merchandiser. A minimum of five gallons is usually required before connecting the merchandiser to the supply line. **DO NOT** flush the merchandiser water system. If you do, you might introduce water line contaminants into the merchandiser.
II. POSITIONING THE MERCHANDISER

You can position this merchandiser anywhere in a bank of machines. It can even be placed on the end flush against a side wall. Be sure you leave enough room in front of the merchandiser for the door to move freely.

BE SURE THE REAR OF THE MERCHANDISER IS AT LEAST 6" AWAY FROM THE WALL. THIS WILL ALLOW WARM MOIST AIR TO BE VENTED OUT OF THE MACHINE'S INTERIOR.

WARNING: THIS MACHINE IS ONLY RATED FOR INSTALLATION IN AN INDOOR LOCATION.

III. CONNECTING EVERYTHING

1. Connect the Merchandiser to the Water Supply:
   a. You will need the following:
      • A coil of copper tubing with outside diameter of 3/8 inch (9.5 mm) or greater. The appropriate plastic tubing may be substituted. The tubing must be long enough to reach from the water source to your machine with enough left over to form a loop about 2 feet (60 cm) in diameter. This will allow you to move the machine without straining the water line.
      • A 3/8 inch (9.5 mm) flare fitting.
   b. Connect the merchandiser to your water supply.

2. Connect the Merchandiser to the Electrical Power Supply:
   Power inside the merchandiser is controlled by the main power switch, located on the power panel.
   a. Make sure the main power switch is OFF.
   b. Connect the merchandiser’s power cord to your wall outlet.
IV. FINAL MECHANICAL PREPARATION

1. Level the Merchandiser:
   a. Place a spirit level on the top front edge of the cabinet with the door fully closed. Adjust the front legs only until the cabinet is reasonably level.
   b. Hold the door open about 4 inches.

   **WARNING**
   **HAVE AN ASSISTANT HOLD THE MERCHANDISER WHILE YOU ADJUST THE LEG LEVELERS.**
   c. Adjust the back legs so that the back leg leveler on the hinge side is off the floor just enough so a piece of paper can slide under it with only a bit of resistance.
   d. For proper weight distribution on all four legs, raise the back leg on the hinge side by unscrewing the leveler 1½ turns.

   **NOTE**
   You may need to use pliers or channel locks to loosen the leg levelers.
2. Mount the Base Plate:

**WARNING**
DO NOT MOVE THE CABINET WHILE HEX HEAD SCREWS AND/OR CARRIAGE BOLTS ARE LOOSENED. THE CABINET WOULD BECOME UNSTABLE AND LIKELY TO TIP AND CAUSE INJURY.

a. Remove the pail(s) from the inside of the merchandiser.
b. Remove the floor liner from the inside of the merchandiser.
c. Remove the two caps as shown.
d. Loosen the left leg assembly carriage bolts and nuts to allow mounting a base plate bracket.
e. Secure one of the base plate brackets to the leg assembly using the two carriage bolt. Tighten the carriage bolts and nuts.
f. Loosen the right leg assembly hex head screws to allow mounting the other base plate bracket.
g. Secure the other base plate bracket to the right leg assembly using the two hex head screws. Tighten the hex head screws.
h. Insert the short arms of the slides into the hinged tabs of the base plate. Position the slide so the notch near the short arm is on the bottom side.
i. Insert the long arms of the slides into the base plate brackets.
j. Insert and secure a cotter pin through the hole in the back of each of the slides.
k. Push the base plate toward the merchandiser cabinet. The front tabs of the base plate brackets should seat in the notches in the long arms of the slides.
l. Replace the caps, liner, and pail(s) removed previously.
3. Install the Water Filter Cartridge:

IF YOUR MERCHANDISER HAS THE WATER FILTER OPTION, IT CANNOT BE OPERATED WITHOUT A PROPERLY INSTALLED WATER FILTER CARTRIDGE. If you do not have the water filter option, continue with "Fill the Tank".

NOTE
Check the water filter installation record. There is a place to write the vend number on the cartridge. The cartridge is effective for a maximum of 64,000 7 oz. vends, 56,000 8 oz. vends, 50,000 9 oz. vends, or 37,000 12 oz. vends. Local conditions may require more frequent replacement.

TO INSTALL THE FILTER:
1. INSERT NEW FILTER, ROTATE COUNTERCLOCKWISE UNTIL FILTER LOCKING TAB SNAPS INTO GROOVE AS SHOWN.

TO REMOVE FILTER:
1. CLOSE THE WATER SHUT-OFF VALVE BY TURNING THE KNOB TO THE HORIZONTAL POSITION AS SHOWN.
2. LIFT THE FILTER LOCKING TAB, ROTATE FILTER CLOCKWISE AND PULL DOWN AS SHOWN.
NOTE

Check the water filter installation record. There is a place to write the vend number on the cartridge. The cartridge is effective for a maximum of 26,000 7 oz. vends, 22,000 8 oz. vends, 20,000 9 oz. vends, or 15,000 12 oz. vends. Local conditions may require more frequent replacement.

National Vendors recommends that you do the following procedure the first time you fill the tank in your EuroDrink merchandiser:

a. Remove the small inner "O" ring from the filter cartridge.
b. Install the filter cartridge.
c. Turn on the water at its source, and perform the tank filling procedure.
d. Turn off the water at its source, remove the filter cartridge, and replace the "O" ring.
e. Install the filter cartridge.

TO INSTALL FILTER:
1. ALIGN RAISED RIB ON FILTER CARTRIDGE WITH MATING SLOT IN HEAD ASSEMBLY.
2. FIRMLY INSERT FILTER CARTRIDGE INTO HEAD ASSEMBLY AND ROTATE COUNTER-CLOCKWISE 1/4 TURN TO THE STOP.
3. OPEN THE WATER SHUT-OFF VALVE BY PUSHING THE HANDLE TO THE HORIZONTAL POSITION AS SHOWN BELOW.

TO REMOVE FILTER:
1. CLOSE THE WATER SHUT-OFF VALVE BY LIFTING THE HANDLE TO THE VERTICAL POSITION AS SHOWN BELOW.
2. ROTATE THE FILTER CLOCKWISE AND PULL DOWN AS SHOWN.
### HYDROLIFE BRAND

#### INSTALLATION:

1. Place the filter inside the canister. Be sure the o-ring is seated in the canister just below the threads.
2. Screw the canister and filter assembly onto the filter head until it comes to a stop.
3. Open the water valve on the inlet line by rotating the handle to the vertical position as shown.

#### REMOVAL

1. Close the valve on the inlet line by rotating the handle into the horizontal position as shown.
2. Relieve water pressure by performing two or three water throws (see the programming section).
3. Unscrew the filter and canister assembly from the filter head. Remove the filter from the canister.
4. Load the Optional Filter Paper:

a. Be sure the main power switch is in the OFF position.
b. Remove the cup station and grounds bucket.
c. Remove the paper holder cover by turning the fastener a quarter turn to the left.
d. Insert a roll of paper into the paper holder. Route the free end of the paper to the brewer as shown.
e. Replace the cover on the paper holder. Secure it by turning the fastener a quarter turn to the right.
f. Feed paper over swing arm assembly and underneath pinion gear shaft.

g. Feed paper through the paper guides.
h. Raise the basket housing assembly and feed paper over the lip of the paper mechanism housing.

NOTE
It may be necessary to reach underneath the brewer between the paper mechanism housing and swing arm assembly to push paper over the lip of the paper mechanism housing.

CONTINUED . . .
i. Reach underneath the brewer between the paper mechanism housing and basket housing assembly and push paper into the top of the paper mechanism housing between paper rollers.

j. Reach underneath the brewer and pull paper roller to the right.

k. Pull paper down between the paper rollers.

l. Release the paper roller.
m. Place the main power switch in the ON position.

n. Test the brewer to be sure the paper feeds properly:

1. On the maintenance keypad, press \*+, then press ▼ until the display shows **BREW TEST**.

2. Press *** to test each brewer position:

   **WARNING**
   Keep away from the brewer mechanism while it is operating. Coming into contact with moving parts could injure you.

   **BREW** The brewer is in the BREW position.
   **BREW R BREW** The brewer is in the BREW position.
   **BREW R FLIP** The brewer is in the FLIP position.
   **BREW R HOME** The brewer is in the HOME position.

3. Make sure the filter paper feeds properly without jamming.

o. Replace the cup station and grounds bucket.

5. **Install the Optional Coin Box Lock**

a. Install the lock cylinder, washer, and nut in the order shown.

b. Tighten the nut.

c. Install the lock bar as shown, and secure with the screw.
6. Set Up and Load the Coin Mechanism

Standard Coin Mechanism

Setting the Quarter Switch. If your coin mechanism is not a MARS TRC 6000, skip this procedure and begin LOADING THE COIN MECHANISM.
a. Flip down the front of the coin mechanism as shown, and set the quarter switch.

Load the Coin Mechanism.
a. Open the cabinet door and the monetary door.
b. Insert coins into their respective tubes until each tube has been filled.
c. Inspect the tubes for shingled coins and correct if necessary.

MDB Coin Mechanism

Install the coin mechanism as follows:

WARNING
Make sure the main power switch is turned OFF before you work on the merchandiser. Failure to do so could result in death or injury.

a. Turn OFF the main power switch. Refer to the instructions provided with the coin mechanism and remove the coin validator assembly.
b. Loosen the coin mechanism mounting screws on the merchandiser so they stand off about 1/8” (0.3 cm).
c. Position the coin mechanism so the three keyed holes fit over the mounting screws. Pull down on the coin mechanism to seat the screws in the keyways.
d. Tighten the mounting screws and reinstall the coin validator assembly.
The following figure shows a coin mechanism, bill validator, and card reader connected to one another via an MDB. Some monetary configurations may not include all of these devices. Connect your coin mechanism as shown:

f. Turn ON the main power switch. Select **MDB MECH** in the **SELECT COIN MECHANISM AND OPTIONS** procedure on page 2-11. Press **Enter** until the standby message is displayed, then press **Enter**. Insert enough coins through the coin slot into the coin tubes to more than cover the empty sensor. Insert coins one at a time and ensure they lay flat in the tubes. The amount of coins you insert is internally recorded.

g. Payout about 6 coins to ensure proper loading.
h. Finish inserting coins through the coin slot to fill all the tubes with coins.
i. Visually check the coin tubes to make sure coins are not shingled.
7. Fill the Tank:

a. Make sure the main power switch is ON.
b. Turn on the water at its source.
c. On the maintenance keypad, press 🔄, then press 📋 until the display shows ☺️
d. Press 📋. You should hear water running into the tank, and the display will show 🧑‍🔧. The water will run until either the tank is full or 12 minutes go by, whichever happens first.

**NOTE**
The inlet water valve only stays open for 12 minutes at a time. This is a safety feature to prevent water from running into a leaky system and making a mess. It is possible for your tank to take longer than 12 minutes to fill if your location has low water pressure. To be on the safe side, check for leaks if the water runs a long time. If you find none, everything is normal; you just have low water pressure.

e. When you hear the water stop running, repeat steps 3 and 4. Under normal circumstances, nothing will happen. If water starts running and the display shows 🧑‍🔧 again, your pressure is low and it is just taking a long time to fill the tank. Repeat this step if necessary to be sure your water tank is full.

8. Fill the Canisters:

Open the lid as shown, and carefully pour the appropriate product into the canister. Repeat for all canisters in the machine.
9. Load Cups:

**CAUTION**

Use only cups which have been designed for use in a hot beverage vending machine.

a. Support the cup mechanism in the upright position.
b. Push the latch forward to release the cup mechanism. Continue to support the cup mechanism while you lower it into the loading position.
c. Remove the turret cover.

**OBSERVE PROPER HYGIENE - DO NOT TOUCH THE CUPS!**

d. Open the bottom of the wrapper on a stack of cups.
e. Insert the wrapped cups into the turret and pull the wrapper out.

DO NOT FILL CUPS ABOVE THE LEVEL MARKED ON THE OUTSIDE OF THE CUP TURRETS OR ABOVE THE "FILL LINE" LABEL INSIDE EACH TURRET, OR MOTOR JAMS WILL OCCUR.

USE ONLY THE SAME SIZE AND BRAND OF HOT DRINK CUPS IN EACH TURRET; DO NOT INTERMIX!

f. Replace the turret cover after the turrets have been loaded.
g. Be sure the cup mechanism is locked into the upright position.

10. Tell the Machine About the Cup Size(s):

Your Eurodrink merchandiser can vend two drink sizes, but it can only handle one actual cup size at a time. Therefore, the cups you loaded must be able to contain both drink sizes. You will need to "tell" the merchandiser which cup you have loaded into it, plus what size you want for the smaller size drink.

a. Press \[7\], then press \[\downarrow\] until the display shows \[CUP \times OZ\].

b. Press \[\text{EDIT}\] until the size of the regular drink is displayed. **NOTE: The size must be the same as or smaller than the cups you loaded.**

c. Press \[\downarrow\] and the display shows \[CUP.1 \times OZ\].

d. Press \[\text{EDIT}\] until the size of the large drink is displayed. This size **MUST BE THE SAME AS** than the cups you loaded!

11. Test the Machine:

Your EuroDrink merchandiser is now ready to vend coffee, just as soon as the water in the tank reaches its operating temperature. Press \( 3 \), and a reading of the tank temperature is displayed. When the display shows 94° C (202° F), it is ready for vending.

a. Close the door, make a selection, and enjoy your cup of coffee!
b. You will now need to do the following before your machine is ready to start earning money:

- Set prices
- Set up the menu
- Establish time of day vending periods (if desired)
- Customize the drink recipes (if desired)
- Set up custom messages (if desired)

Refer to the Programming section for details on these and other procedures.
V. ADJUSTMENTS AND MINOR MAINTENANCE

1. Empty the Bill Stacker

2. Adjust the Water Valves

Water valves do not usually require adjustment, but in some cases adequate water volume cannot be achieved by the throw time setting alone (see the programming section). IF ABSOLUTELY NECESSARY, adjust the valves in conjunction with setting the factory default timers during the Product Configuration programming mode.

1. Using a slotted screwdriver, turn the adjustment screw clockwise to decrease the water flow rate.
2. Turn the adjustment screw counterclockwise to increase the water flow rate.
3. **Adjust the Air Pressure**
   This control determines the system pressure provided by the air compressor. Adjust as follows:
   a. With the compressor running, pinch the brewer inlet air tube.
   b. Adjust the pressure to read 10 - 12 psi on the gauge.

   This will produce a pressure of 3 - 6 psi using regular coffee and 8¼ oz cups. No further air pressure adjustments should be necessary.

4. **Install Canisters.**
   1. Place the canister in position as shown.
   2. Engage the pins on the motor shaft with the slots in the canister coupler.
   3. Fit tabs on canister into the slots on the canister shelf.
   4. To ensure canister is correctly engaged with the rear mounting bracket, gently push down on the front edge of the canister lid.
5. **Adjust the Cup Mechanism.**

1. Place seven cups in the cup ring.
2. Observe the clearance as shown in view B.
3. If necessary adjust by first loosening the adjustment arm screw (view A).
4. Move adjustment arm until correct clearance is achieved.
5. Hold adjustment arm in place and tighten adjustment arm screw.
6. **Set Up the Menu Assembly.**

1. From the inside of the door, remove the two screws as indicated, and remove the end cap as shown.
2. Loosen the remaining 10 screws as indicated 1/2 turn. **Do not loosen the screws any more than necessary to avoid stripping out the menu frame.**
3. Remove the menu board. If it is still held too tightly, repeat step 2.
4. Set up the menu board as desired and reinstall it in the reverse order of disassembly.
PROGRAMMING THE EURODRINK

Getting Around

Getting around the Eurodrink software is pretty easy once you know the features that are available to you, and how to use them. The three main parts you will use are the SERVICE KEYPAD, the SELECTION SWITCH PANEL, and the DISPLAY.

The Service Keypad

For most of your programming jobs, you will be using the service keypad, conveniently located on the monetary panel. The service keypad has 16 keys. The three columns on the left are the MODE keys. The right hand column contains the MOVEMENT keys.

The Selection Switch Panel

The selection switch panel is also located on the monetary panel. Unlike the service keypad, it is accessible when the cabinet door is closed. These are the keys the customer will use to make selections. You can also use these keys during programming procedures.
NOTE

Any place you can press the down arrow to move forward, you can press the up arrow to go backward!
The diagram on the left is a picture of your path through a single task within the PRODUCT CONFIGURATION programming mode. Think of the diagram as if it were a house, with each display representing a room in the house. The EDIT key is a one-way front door, and the EXIT key is just that - a one-way exit. The arrow keys are doorways between the rooms, and you can go either way between them.

Look at the example. From the PRODUCT display, you can press the down arrow key and set up the sugar throw. If you wanted to set up dry products, press the EDIT key. The first screen you see will let you adjust the throw time for the selection A dry product. Pressing the down arrow key takes you to the extra strong selection A dry product. Pressing the down arrow again takes you to the selection B product; pressing the up arrow key returns you to the previous display, and so forth. When you get to the last dry selection (in this case, it's I), pressing the down arrow moves you back to the top of the list. At any point, you can press the EXIT key and return to the PRODUCT display. Pressing the down arrow there takes you to the SUGAR display. From either PRODUCT or SUGAR, pressing EXIT gets you back to the standby message.

SHORTCUT:

When setting up selections, you can go directly to the selection you are interested in simply by pressing the appropriate letter key. Let's say you wanted to set up the throw time for the D selection dry product. Instead of repeatedly pressing the down arrow, you can press D, and you will immediately get the display for that selection.

The Displays

The 10-character display performs two functions, and is referred to in this book as "the display":

1. It shows the customer's selection and how much credit is in the machine, as well as the ready, service, and time of day messages.

2. It provides information and feedback to the service person during mainte-
nance.
The Function Keys

The FUNCTION keys on the service keypad can be used for up to three things:

**THE NUMBER**
You might be asked to enter a numerical value. You can do this in two ways: pressing this key is the same as pressing the “5” on the selection switch panel.

**THE PRIMARY PURPOSE**
This is the main job of the key. From the standby message, it will allow you to enter a programming mode. In this example, you can view stored sales data.

**THE SECONDARY PURPOSE**
This is the key’s “second job”. This key can be used to delete a character when you are editing custom messages.

Other Keys

The MOVEMENT keys on the control panel let you move inside a mode, and back and forth between modes. To see how these keys let you move around, study the flow diagram on the next page.

- The up and down arrow keys are your “legs”, which let you move up and down the list of tasks. These keys are what let you continue from one step to the next in programming procedures.

- This is your “activate” or “choose” key. It “opens a door” to additional information and lets you begin a programming task once you are inside of a mode. Sometimes, it is used as a toggle switch to show you your choices during a programming task.

- This is your “end” key. Pressing it one or more times will move you back to the start of the mode, or all the way back to the standby message.

- This key lets you start an action, such as a test.
CONTROL PANEL SWITCH FUNCTIONS EXPLAINED

Each of the control panel switches has one or more jobs to do. This list will give you a short overview of those jobs.

1. Press this button to put your machine into the Price Setting mode. You can see maximum and minimum machine prices, and change prices for entire machine or individual selection.

2. Press this button to set up how the Free Vend mode will operate.

3. Press this button to:
   - Set time of day
   - Set day, month, year
   - Set up time of day intervals for inhibit, freevend, and discount vending
   - Select display messages
   - Edit messages
   - Set message scrolling speed

4. Press this button:
   - Select display language
   - Select coin mechanism and options
   - Select bill validator and options

5. Press this button:
   - View total sales and vends by whole machine, selection, or drink size
   - Clear resettable data
   - View or set machine ID

6. Press this button to:
   - Download data into your portable data collection device (PDCD), OR
   - Set printer baud rate, depending upon which device you are using

7. Press this button to:
   - Set machine configuration
   - Set up drinks
   - Set which selections are active
   - Set temperature display units (°F or °C)

8. Press this button to:
   - Set time of day
   - Set day, month, year
   - Set up time of day intervals for inhibit, freevend, and discount vending
   - Select display messages
   - Edit messages
   - Set message scrolling speed

9. Press this button to pay one or more coins from the coin mechanism.

10. *Allows you to see any fault or condition that has placed the machine out of service*

11. Press this button:
    - Perform TEST VENDS
    - Test machine functions

12. Press this button:
    - Enter the SUPERVISOR mode
    - Change the SUPERVISOR access code

    - Test displays
    - Fill the water tank

    - Lock and unlock access to functions
    - Set free vend code
Programming Flowcharts

The flowcharts on the following pages will provide you with a "map" to the different programming features of your machine. Once you are familiar with the detailed programming steps given later in this section, you can use the flowcharts as a shortcut. Each chart begins with the key you will use to access those steps. Follow the lines and arrows from one step to another. A rectangular box contains the functions or tasks you will perform at that point. A diamond shaped box is a decision statement. For example, look at the MACHINE CONFIGURATION chart, below. At one point, you are asked to choose between an EXEC coin mechanism and all others. Depending upon your decision, you will take a different path. Note that choosing any mechanism except an EXEC gives you several more steps to perform before you get to the WINNER option.

CHANGE MACHINE ID NUMBER, IF PERMITTED BY SUPERVISOR

View error messages, if errors are present.
Enter **SUPERVISOR** code. Upon successful entry, the following can be accomplished:

- Change the supervisor code.
- Lock or unlock mode keys.
- Select printer, DEX, or DEX with clearing.
- View water tank temperature.
- View machine configuration code.
- View which selections are active.
- View cup only vending status.
- View whip/no whip option.
- View whether automatic delivery door is enabled.
- View software version number.
THE SUPERVISOR MODE

The supervisor is allowed to do things that a normal user cannot, like controlling access to certain modes. The supervisor can lock out any of the programming modes to anyone who does not have the right "key". Once a supervisor enters the proper code, he or she will be able to:

- Change the supervisor access code
- Lock out any or all of the service keypad modes
- Select whether price lines are used
- Set whether data is cleared after being downloaded into a portable data collection device
- Grant or deny access to data items during DATA RECALL
- Modify the machine configuration
GAIN ACCESS TO THE SUPERVISOR MODE

1. Press \[\#\] \[\text{Enter Code} \]. The display shows: \textit{Enter Code}. You must enter the four-digit supervisor code within 6 seconds to gain access.

\textbf{NOTE}

A new machine has a factory-set supervisor code of 0000.

When you have entered the right code, you will hear two beeps and see \textit{Unlocked} in the display.

ENTER A NEW SUPERVISOR CODE

1. Follow the steps in \textit{GAIN ACCESS TO THE SUPERVISOR MODE}.

2. Press \[\#\] \[\text{Super} \] \[\text{Enter Code} \] until the display shows \textit{Super XXXX}. The X's represent the current supervisor code. Use the number keys to enter a new code.

\textbf{IMPORTANT!}

If you enter a new code, be sure to keep a written record of it. There is no other way to access the \textit{SUPERVISOR} mode.

3. CONTINUE.

ENTER A FREEVEND CODE

1. Follow the steps in \textit{GAIN ACCESS TO THE SUPERVISOR MODE}.

2. Press \[\text{Enter Code} \] until the display shows \textit{Free XXXX}. The X's represent the current freevend code. Use the number keys to enter a new code. If the code is anything other than "0000", it must be entered after the key lock is turned in order to enable free vends.

3. CONTINUE
**EURODRINK OPERATOR’S GUIDE**

![Lock or Unlock Mode or Payout Keys](#)

**LOCK OR UNLOCK MODE OR PAYOUT KEYS**

1. Follow the steps in **GAIN ACCESS TO THE SUPERVISOR MODE**.

2. Press ![Unlock/Lock](#) until the display shows either **X. LOCKED** or **X. UNLOCKED**.

   “X” refers to the number or character shown on the mode or payout key in question (1 through 9, # and *). To see if a key is locked or unlocked, press that key.

3. Press ![Edit](#) to change between locked and unlocked. When anyone other than the supervisor tries to enter a locked mode, the display shows **LOCKED**.

   **NOTE**

   The following mode keys cannot be locked out:

   ![Mode Keys](#)

4. CONTINUE.

![Set Printer or DEX Options](#)

**SET PRINTER OR DEX OPTIONS**

1. Follow the steps in **GAIN ACCESS TO THE SUPERVISOR MODE**.

2. Press ![Unlock/Lock](#) until the display shows:

   **PRINTER** means that data will be sent directly to a printer,
   OR
   **DEX ONLY** means that data remains in memory after it is downloaded into a portable data collection device (PDCD),
   OR
   **DEX +CLR** means that resettable data is cleared after it is downloaded into a PDCD.

3. Press ![Edit](#) to change between the three choices.

4. CONTINUE.
LOCK OR UNLOCK DATA CLEARING ACCESS

1. Follow the steps in **GAIN ACCESS TO THE SUPERVISOR MODE**.

2. Press until the display shows either **# LOCKED** or **# UNLOCKED**. **LOCKED** means that non-supervisors cannot clear resettable machine sales and vend data from the key.

3. Press to switch between **# LOCKED** and **# UNLOCKED**.

   **NOTE**

   The supervisor can clear data regardless of this setting, provided the supervisor code was correctly entered first.

4. **CONTINUE**

SELECT DISPLAY LANGUAGE

1. Press The current LANGUAGE is shown in the display. Press to choose the desired language. Your choices are: **ENGLISH**, **DEUTSCH**, **FRANCAIS**, **ESPAÑOL**, **PORTUGUES**, **SWEDISH**, or **NEDERLANDS**.

2. **CONTINUE**
EURODRINK OPERATOR’S GUIDE

SELECT COIN MECHANISM AND OPTIONS

1. Press \( \downarrow \) and then press \( \downarrow \) until the current COIN MECHANISM is shown in the display. Press \( \downarrow \) to choose the desired coin mechanism.

Your choices are: DUMBMECH, MDBMECH, EXECMECH, or NOMECH

NOTE
If you selected EXECMECH you can exit the function.

2. Press \( \downarrow \) until the display shows CHANGE XXX.

Coins and bills which are less than or equal to this value will be returned without a purchase being made.

Examples:

- CHANGE 0.00 - Forced vend; NO change returned without a purchase.
- CHANGE 25 - Nickels, dimes, and quarters returned without purchase.
- CHANGE 1.00 - $1 bills and SBAs will be returned as change without purchase. Nickels, dimes, and quarters are also returned.

3. Press \( \downarrow \) until the display shows LOW.MSG XXX. The display will show USE EXACT CHANGE when the amount of available change in the coin mechanism falls below the value of “X.XX”. Enter a value with the number keys. For example, if LOW.MSG 1.00 is displayed, the USE EXACT CHANGE message is displayed when less than a dollar’s worth of change is in the coin mechanism.

4. CONTINUE.

SELECT BILL VALIDATOR AND OPTIONS

1. Press \( \downarrow \) and then press \( \downarrow \) until one of the following is displayed:

- NO DBV - No bills will be accepted or there is no bill validator installed (you can exit the function).
- SER.125.1020 - The serial bill validator is selected and will accept $1, $2, $5, $10, and $20 bills. Use BILL SELECTION METHOD below to change the bills which will be accepted.
A standard MDB bill validator is selected. It will accept $1, $2, $5, $10 and $20 bills. Use BILL SELECTION METHOD below to change the bills which will be accepted.

BILL SELECTION METHOD:
The standard $1, $2, $5, $10 and $20 bills are enabled by pressing the 1, 2, 5, 6, or 7 key(s), respectively, to display which bill(s) will be accepted.

- An MDB bill validator which accepts non-standard bills or tokens is connected and operating. Press to enter list of bills. (See INITIAL SETUP OF NON-STANDARD BILL VALIDATOR on the following page.)

BILL LIST OPERATION:
Use and to scroll through the list of bills.
Use to turn the bill acceptance ON or OFF.
Use to move up to the top level screen.

1. 1.00 ON
   - 1. = Bill validator channel 1, each bill has its own channel
   - 1.00 = Bill value
   - ON = $1.00 bill will be accepted

1. 1.00 OFF
   - OFF = $1.00 bill will not be accepted

TKN
   - Token bills (same as coupon bills)
SELECT MONETARY OPTIONS

This function lets you:
- Set declining balance,
- Set currency acceptance on low change,
- Set overbuy options,
- Set last bill stacking options

<table>
<thead>
<tr>
<th>DECLINING BALANCE:</th>
<th>Once credit is established, multiple vends may occur until the coin return is pressed.</th>
</tr>
</thead>
</table>

1. Press \[4\] \[SELECT\] then press \[\] until one of the following is displayed:

   **DECLINE.ON** - More than one vend is allowed, with a declining balance.

   OR

   **DECLINE.OFF** - A declining balance is not allowed.

   Press \[EXIT\] to display the desired choice.
2. Press \( \text{ACC} <X.XX \) until one of the following is displayed:

\[ \text{ACC} <X.XX \] - The last bill which meets or exceeds maximum price will be held in escrow.

\[ \text{ACC.STK} X.XX \] - The last bill which meets or exceeds maximum price and MDB coupon bills (token bills) will be immediately stacked.

Example: If setting is \[ \text{ACC.STK} 1.00 \] and maximum price is $1.50. This setting will immediately stack the second $1.00 bill inserted.

Press \( \text{EDIT} \) to display the desired choice.

The value of "X.XX" has two purposes:

a. The value of "X.XX" tells the machine how big a bill or coin to accept even though there is not enough change in the coin mech to cover all possible paybacks.

   • For example, enter 1.00. Therefore, the machine will take a dollar bill or coin even though there is less than $1.00's worth of change. Entering 5.00 tells the machine to take a five even though there is less than $5.00's worth of change, and so forth.

   **NOTE:** This could cause a customer to be short-changed.

   • Entering 0.00 means that bills or coins will only be accepted if there is enough change to cover them.

b. The value of "X.XX" tells the machine how much the customer is allowed to overbuy a product. The customer will be short-changed when an overbuy occurs.

Example:
For a value of $0.25: if there is no change in the machine and the customer inserts a $1.00 bill. The customer can purchase a product for $0.75 even though the change cannot be paid back. The customer will be short-changed. Normally a purchase will not be approved unless all change can be paid.

Entering 0.00 means that the vend will only be approved when the correct change can be returned (overbuy disabled).

3. CONTINUE
SELECT CARD READER AND OPTIONS

1. Press \( \text{.card reader} \), then press \( \text{select} \) until the current card reader is shown in the display. Press \( \text{edit} \) to choose the desired card reader.

Your choices are: \( \text{NO CARD}, \text{DUMB CARD}, \text{or MDB CARD} \).

2. Press \( \text{select} \) until one of the following is displayed:

   - \( \text{REVALUE.ON} \) - Allows credit to be transferred onto the card
   - \( \text{REVALUE.OFF} \) - Credit cannot be transferred to the card

   Press \( \text{edit} \) to display the desired choice.

3. CONTINUE
SET UP WINNER MODE

WINNER: At pre-selected intervals, a customer may receive a refund for a selection. You can select the intervals and qualifying selections.

1. Press \[\text{WINNER OFF}\] then press \[\text{WIN} \text{ XXX}\] until one of the following is displayed:

   \text{WINNER OFF} \quad \text{Winner function is disabled.}

   \text{OR}

   \text{WIN XXX} \quad \text{Winners are allowed at certain intervals, represented by "XXX".}

   Press \[\text{EDIT}\] to display the desired choice.

   If you selected \text{WINNER OFF}, you can CONTINUE. Otherwise, go to the next step.

2. The display shows \text{WIN XXX}. XXX represents the number of vends which must occur per each winner vend. For example, an interval number of 50 means that a winner can happen any one time during the next 50 vends. Using the number keys, enter an interval number between 10 and 9999.

3. Press \[\text{WIN XXX}\]. The display shows \[\text{*------}\]. The dashes in the display represent which selections are allowed winners. Press the appropriate letter key to enable a selection; press the key again to disable it. For example, pressing A, C, and E will cause the display to look like this: \[\text{* A-C-E-----}\], meaning that all A, C, and E selections can have a winner.

ADVANCED OPTIONS:

- Press \[\text{EDIT}\] to enable all selections; press \[\text{EDIT}\] to disable all selections.
- Press 0 or 1 to enable winners by cup size.

AN EXAMPLE . . .

You want to enable winners on all selections except E and F. Do the following:

a. Press \[\text{WIN XXX}\]. The letters A through J appear in the display instead of the dashes.

b. Press E and F. The letters E and F in the display are replaced by dashes.

4. CONTINUE.
SET UP THE MUG DISCOUNT

1. Press \[\text{[Mug Discount]}\], then press \[\text{[Down Arrow]}\] until the display shows \text{MUG DSC XX}. XX represents the value of the discount customers will receive for using their own mugs or cups. Enter the amount with the number keys. Enter 0 for no discount.

2. CONTINUE.

SET THE PRINTER BAUD RATE

1. Press \[\text{[Baud Rate]}\]. The display will show one of the following rates: \text{BAUD 1200, BAUD 2400, BAUD 4800, or BAUD 9600}.

2. Press \[\text{[Edit]}\] until the desired baud rate is displayed. \text{NOTE: This baud rate must match that of your printer, or it won’t work properly.}

3. CONTINUE.

LOCK OR UNLOCK SELECTIONS

1. Press \[\text{[Lock/Unlock Selections]}\]. The display shows \text{LK. - - - - - - -}. This shows a list of selections which are locked. Here, all selections are unlocked because they show up as dashes (-). Press the appropriate selection letter to switch from locked to unlocked and back again. For example, to lock out the “A” and “C” selections, press those letter keys on the selection switch panel. For this example, the display will show \text{LK. A - C - - - - -}.

You can lock all selections at once by pressing \[\text{[Lock All]}\].

Unlock them all at once by pressing \[\text{[Unlock All]}\].

2. CONTINUE.
SET DRINK SIZES

Your Eurodrink is capable of vending two different size drinks, using one size cup. Be sure that the drink sizes you select are the same or smaller than the cup size you actually load in the machine.

1. Press \textcircled{7}. The display shows \textit{CUP} \textit{X OZ}.
   
   This is for the regular size drink. The display indicates that the drink size is \textit{X} ounces.

2. Press \textcircled{EDF} until the desired drink size is displayed.

3. Press \textcircled{edf} The display shows \textit{CUP.1 Y OZ}.
   
   This display indicates that the large drink size is \textit{Y} ounces.

4. Press \textcircled{edf} until the desired drink size is displayed.

TO LOAD THE FACTORY DEFAULT TIME SETTINGS . . .

for your cup size, press \textcircled{X}. \textit{CLEARING} is displayed; keep holding the key until you see \textit{FINISHED} in the display.

5. CONTINUE.
EURODRINK OPERATOR’S GUIDE

SET THE DRY PRODUCT THROW TIMES

1. Press \( \text{TAB} \), then press \( \rightarrow \) until the display shows PRODUCT.

2. Press \( \text{EDIT} \). The display shows DRY. A XX. "XX" represents the throw time of the product for selection A. See "SETTING THROWS" for instructions on how to change the time for this and all other selections.

3. CONTINUE.

SET THE SUGAR THROW TIMES

1. Press \( \text{TAB} \), then press \( \rightarrow \) until the display shows SUGAR.

2. Press \( \text{EDIT} \). The display shows SUG. A XX. "XX" represents the sugar throw time for selection A. See "SETTING THROWS" for instructions on how to change the time for this and all other selections.

3. CONTINUE.

SET THE LIGHTENER THROW TIMES

1. Press \( \text{TAB} \), then press \( \rightarrow \) until the display shows LIGHTENER.

2. Press \( \text{EDIT} \). The display shows LIT. A XX. "XX" represents the lightener throw time for selection A. See "SETTING THROWS" for instructions on how to change the time for this and all other selections.

3. CONTINUE.
SET THE SUGAR SUBSTITUTE THROW TIMES (IF PRESENT)

1. Press  , then press  until the display shows SUGAR SUB.

2. Press . The display shows SUB. A XX. “XX” represents the sugar substitute throw time for selection A. See “SETTING THROWS” for instructions on how to change the time for this and all other selections.

3. CONTINUE.

SET THE WATER THROW TIMES

1. Press  , then press  until the display shows WATER.

2. Press . The display shows WAT. A XX. “XX” represents the water throw time for selection A. See “SETTING THROWS” for instructions on how to change the time for this and all other selections.

3. CONTINUE.

SET THE STEEP TIMES

1. Press  , then press  until the display shows STEEP.

2. Press . The display shows STP. A XX. “XX” represents the steep time for selection A. See “SETTING THROWS” for instructions on how to change the time for this and all other selections.

3. CONTINUE.
EURODRINK OPERATOR'S GUIDE

SET THE AIR COMPRESSOR RUNNING TIMES

1. Press \[ \text{SET } \] then press \[ \text{Down Arrow} \] until the display shows AIR.

2. Press \[ \text{EDIT} \]. The display shows AIR. A XX. “XX” represents the air compressor running time for selection A. See “SETTING THROWS” for instructions on how to change the time for this and all other selections.

3. CONTINUE.

SET END-OF-VEND DELAY TIME

This setting can delay the end of the vend (THANK YOU message and delivery door opening) to compensate for increased liquid flow times inside the machine.

1. Press \[ \text{SET } \] then press \[ \text{Down Arrow} \] until the display shows DELAY.

2. Press \[ \text{EDIT} \]. The display shows DLY.A X. “X” is the delay time (in seconds) for the A selection.

3. Enter a new value, if desired, between 1 and 99.

4. Repeatedly pressing \[ \text{Down Arrow} \] will display the delay times for all selections. At each display, change the delay time if desired.

5. CONTINUE.
SET WHIPPER OPTIONS

1. Press \[ \text{WHIP P} \] then press \[ \text{DOWN} \] until the display shows \text{WHIPPERS}.

2. Press \[ \text{EDIT} \]. The display shows \text{WHP. A XXX}. "XXX" represents the whipper options for selection A as listed below.

3. Press \[ \text{EDIT} \] to change:
   - ON- The last 3 seconds of the drink is always whipped
   - ON+ The whole drink is always whipped
   - OFF The drink is never whipped

   \text{If J WHIP is selected (see VIEW MACHINE OPTIONS):}
   - OPT- The last 3 seconds of the drink is whipped only when the J key is pressed
   - OPT+ The whole drink is whipped only when the J key is pressed

   \text{If J NO WHIP is selected (see VIEW MACHINE OPTIONS):}
   - OPT- The last 3 seconds of the drink is whipped unless the J key is pressed
   - OPT+ The whole drink is whipped unless the J key is pressed.

4. Repeatedly pressing \[ \text{DOWN} \] will display the whipper options for all selections. At each display, change the option if desired.

5. CONTINUE.

ADJUST THE WATER TANK TEMPERATURE SETPOINT

1. Press \[ \text{WHIP P} \] then press \[ \text{DOWN} \] until the display shows \text{SET XXX °F}. XXX represents the water tank temperature setpoint in degrees Fahrenheit. If a decimal point appears next to the "F", the heater is on.

2. If desired, enter a new setpoint. Accepted range: 149° - 205° F (65° - 96° C). The lower limit for vending is 10° below setpoint, up to a maximum of 180° F (82° C).

3. To change units (replace the "F" with a "C" for Celsius), press \[ \text{EDIT} \].

4. CONTINUE.
EURODRINK OPERATOR’S GUIDE

SET THE RATIO OF CHOCOLATE IN CAPPUCCINO

1. Press \[ \text{ } \] , then press \[ \text{ } \] until the display shows either:

   **RATIO XX**  
   “XX” is the percentage of chocolate contained in a cappuccino drink.

   OR

   **RATIO OFF**  
   No ratio is selected.

2. Press \[ \text{ } \] to switch between these two displays. To change the value of **RATIO XX**, enter the numbers directly. This is a quick way to set up your cappuccino drinks. See table D2 to see the actual throw times/amounts for certain preset ratios. You can set a ratio close to your taste, turn ratio OFF, then alter the product throw.

   **NOTE**  
   Leaving this step with **RATIO OFF** displayed does not alter any previous settings for E and I selections. Leaving this step with a ratio set will alter those settings. The ratio automatically selects the times for water and dry product throw. The E and I selections no longer appear in the displays for those steps. If you desire greater control over your cappuccino drinks, leave ratio OFF.

3. CONTINUE.

SET THE BREWER RINSE TIME INTERVAL

1. Press \[ \text{ } \] , then press \[ \text{ } \] until the display shows **SAN.TIM XX**.

   “XX” represents the time of day (in hours and tenths of hours) the machine rinses the brewer. For example, **SAN.TIM 4.5** means that brewer rinse takes place at 4:30 am. Use the number keys to enter a new time, if desired. Range: 0.0 - 23.9 in .1 hour (6 minutes) increments.

2. Press \[ \text{ } \] . The display shows **SAN.HRS XX**. "XX" represents how soon the machine rinses the brewer after the last brewed selection. For example, **SAN.HRS 2.5** means brewer rinse takes place 2.5 hours after the last vend. Use the number keys to enter a new time, if desired. Range: 2.0 - 12.5 hours, in .1 hour (6 minutes) increments.

3. CONTINUE.
SET THE MIXING BOWL RinSE TIME AND INTERVAL

1. Press \( \text{Rin} \) \( \text{Tim} \) X.X then press \( \text{Down} \) until the display shows one of the following:
   \( \text{Rin.Tim X.X} \) "X.X" represents the time of day (in hours and tenths of hours) the machine rinses the bowls. For example, \( \text{Rin.Tim 4.5} \) means that the bowl rinse takes place at 4:30 am. Range: 0.0 - 23.9 in .1 hour (six minute) increments.

   OR

   \( \text{Rin.Soff} \) No bowl rinse takes place.

   OR

   \( \text{Rin.Hrs X.X} \) "X.X" represents how soon (in hours and half hours) the machine rinses the bowls after a vend. For example, \( \text{Rin.Hrs 2.5} \) means that the bowl rinse takes place 2 and a half hours after the last vend. Range: 2.0 - 12.5 in .1 hour (six minute) increments.

2. Press \( \text{Edit} \) to switch between these options, and the number keys to enter new values.

3. CONTINUE.

NOTE
If 24 hours passes without a vend, no rinsing will take place. This eliminates unnecessary rinsing over a weekend or holiday.
SET THE MACHINE CONFIGURATION CODE (Supervisor Mode Only)

1. Press then press until the display shows CONFIGURE.
2. Press . The display shows CONF WXYZ “WXYZ” is the machine configuration code. W represents the machine type, X is the soup and sugar substitute configuration, Y is the brewer configuration, and Z is canister mapping. The following tables give the possible values for each of the four numbers. Enter the appropriate configuration code for your machine.
3. CONTINUE.

6360052  Page - 55  July, 2001
SET UP ACTIVE SELECTIONS (Supervisor mode only)

1. Press \[\text{ }\] then press \[\Rightarrow\] until the display shows \[0. \text{ ABCDEFGH}\.\] These are the selections that are active for drink 0, the regular size cup. In this display, all selections are active. Press the appropriate letter to turn selection availability ON or OFF.

2. Press \[\Rightarrow\] until the display shows \[1. \text{ ABCDEFGH}\.\] These are the selections that are active for drink 1, the large size cup. In this display, all selections are active. Press the appropriate letter to turn selection availability ON or OFF.

- Press \[\ast\] to turn on all selections,
- Press \[\#\] to turn off all selections.

NOTES
Any selection not shown will not appear in any other configuration step, and will return a \textit{MAKE ANOTHER SELECTION} message if selected by a customer. Press the appropriate letter to turn selection availability ON or OFF.

Selections not available because of machine configuration will not be shown in this list.

3. CONTINUE.

SET UP THE CUP ONLY OPTION (Supervisor mode only)

1. Press \[\text{ }\] then press \[\Rightarrow\] until the display shows \[\text{CUPVND X/Y}\.\] This allows you to set whether a customer can buy a cup only (no drink), and which types of cups will be vendned. \(^\text{"X/Y"}\) represents the cup only vend configuration.

2. Press \[\text{EDIT}\] to switch between the following configurations:

- \(-/-\) = Cup only not allowed
- \(0/-\) = Regular cup only vendned
- \(-/1\) = Large cup only vendned
- \(0/1\) = Both cup sizes vendned

3. CONTINUE.
SET UP WHIP OPTIONS (Supervisor mode only)

1. Press \[\text{J WHIP}\] then press \[\text{\downarrow}\] until the display shows either:
   - \[\text{J WHIP}\] This means that optionally whipped selections will be whipped when \text{J} is pressed.
   - \[\text{J NO WHIP}\] Optionally whipped selections will be whipped unless \text{J} is pressed.

2. Press \[\text{EDIT}\] to switch between these two displays.

3. CONTINUE.

SET UP DELIVERY DOOR OPTIONS (Supervisor mode only)

1. Press \[\text{DOOR ON}\] then press \[\text{\downarrow}\] until the display shows either:
   - \[\text{DOOR ON}\] The automatic delivery door (if so equipped) is enabled.
   - \[\text{DOOR OFF}\] The automatic delivery door (if so equipped) is disabled.

2. Press \[\text{EDIT}\] to switch between these two choices.

   NOTE
   - \[\text{DOOR OFF}\] must be selected if your machine does not have an automatic delivery door.

3. CONTINUE.
Except for where indicated, the procedures for setting dry product, sugar, lightener, sugar substitute, and water throws are identical. This example will take you through setting the throw for a dry product. The illustration shows a typical display with all possible elements present:

**THE "1" MEANS THAT THIS SELECTION IS IN THE ALTERNATE SIZE CUP (CUP1) FROM STEP 2 OF THE PRODUCT CONFIGURATION PROCEDURE. REMEMBER WHAT YOU SELECTED IN STEP 2 OF PRODUCT CONFIGURATION. IF BOTH CUP SIZES ARE THE SAME, THIS "1" WILL NEVER APPEAR.**

**THE PLUS SIGN SHOWS THAT THIS IS FOR A STRONG DRINK.**

**THIS INDICATES WHICH ITEM IS BEING EDITED. THE CHOICES ARE: DRY, SUG, LIT, SUB, OR WAT.**

**THIS IS THE SELECTION LETTER.**

**THIS IS THE ACTUAL THROW TIME, SHOWN IN SECONDS AND 100THS OF A SECOND.**

**1. DRY. A XXX** Enter a new throw time (represented by XXX) for the dry selection A product.

**2. Subsequent displays will contain the various elements as shown above, depending upon your machine configuration.**

**SOME DIFFERENCES . . .**

- Sugar, lightener, and sugar substitute will be used for both A and B (coffee) selections. Therefore, the A and B will not appear in the displays. The coffee selections are represented by X.
- Subsequent displays will show selection letters for all the remaining selections containing these items.
- All timers except DELAY timers are entered in .05 second increments. DELAY timers are entered in whole second increments.
COLLECTING DRY PRODUCT GRAM THROWS

Measuring the gram throw allows you to get the right amount of dry product or condiment into your hot drink. To do this, you need a container to catch the product throw and an accurate gram scale to measure its weight.

1. Make a measuring container by cutting down a paper cup until it fits under the canister spout as shown.
2. Weigh the measuring cup and zero the gram scale accordingly.
3. Make 5 test throws as instructed in the programming steps, then average the results.
4. Weigh the test throw.
5. Repeat steps 3 and 4 until you get the correct product or condiment weight.

Tables D1 and D2 show the factory default settings for the various dry products sold by the merchandiser. They are good starting points for you to use in setting up your machine. In the end, the amount of dry product or condiments you use in your drinks depends upon taste and manufacturers’ recommendations. Recommended weights and times are for guidance only, and you do not have to adhere to them.

D = Espresso  
E = Cappuccino  
I = Chocolate times for cappuccino

* The actual gram weight of a product or condiment throw will vary depending upon the type of product or condiment used. The weights given are approximate based upon factory testing.

* Separate sugar, lightener, and sugar substitute timers are available for selections A/B/C, D, E, and F.
CAPPUCINO

Cappuccino is made with various ratios of chocolate to coffee, according to taste. Lightener (E timer) is also used for cappuccino. Table D2 shows numerous different ways to make cappuccino for each size of cup in your machine. For example, the default chocolate-to-coffee ratio of 15 - 85 in a 7 oz. cup consists of the following:

- A chocolate throw (product I) lasting 0.55 seconds, providing 15% of the normal chocolate throw (approximately 4.5 grams*).
- A water throw for the chocolate (water I) lasting 2.55 seconds (chocolate product throw plus 2 seconds to ensure the mixing bowl is fully rinsed). The volume is about 56 ml, depending upon how the flow rate is adjusted.
- A throw for cappuccino coffee (product E) equal to a normal coffee (product A) throw.
- A water throw for the freeze dry coffee selection (water E) lasting for 4.35 seconds (101 ml). OR
- A water throw for the fresh brew coffee selection (water E) lasting for 4.00 seconds (115 ml). In either case the water volume is enough to fill the remainder of the cup.

The actual mixing sequence is as follows:
1. The coffee portion of cappuccino is made using the same canister/valve combination as the normal (A) coffee.
2. After the coffee is completely in the cup, the chocolate portion is made with the selection G canister/valve combination. This gives the drink its traditional “layering”.

HINTS:
To “fine tune” your cappuccino drink to your exact taste, set a ratio close to what you like (between 15% and 50%), then turn ratio OFF. Adjust the individual timers until you are satisfied. You may find it necessary to cut down on the amount of sweetener available to a cappuccino drink with a high ratio of chocolate, as the chocolate contains sweetener of its own.

CAFFÉ LATTE

Caffe Latte has a rich, robust coffee flavor. It is a full-bodied hot beverage with extra creamer, whipped to frothy perfection, with sugar optional. Try this recipe to expand your gourmet product selections and increase premium pricing opportunities.

ENTER THE SUPERVISOR CODE:

1. Press . The display shows: ENTER CODE. You must enter the four-digit supervisor code within 6 seconds to gain access.

NOTE
A new machine has a factory-set supervisor code of 0000.

When you have entered the right code, you will hear two beeps and see SUPERVISOR in the display.

SET THE MACHINE TO VEND A LARGE "D" SELECTION:

1. Press the following keys: , , and . The CONFIGURE screen is displayed.

2. Press twice. The display should look something like this:

   1. ABCDEFGH. Make sure the “D” is displayed. If not, press “D” on the selection switch panel to display the “D”.

3. Press twice to return to the standby message.

SET UP YOUR SELECTION:

Follow the instructions in the PRODUCT CONFIGURATION section of the EURODRINK Operator’s Guide.

1. Make sure the machine is configured to use 12 oz. cups.
2. Set up the 1D selection as follows:
   a. Coffee: 17 grams
   b. Sugar: 2.5 grams
   c. Lightener: 5 grams
   d. Water: 6 ounces (about 177 ml)
   e. Steep time: 12.5 seconds
   f. Whip: ON +

To get these measurements, refer to PRODUCT CONFIGURATION. See COLLECTING DRY PRODUCT GRAM THROWS, and perform test throws of the dry ingredients. See COLLECTING WATER THROWS, and perform test water throws.
EURODRINK OPERATOR'S GUIDE

EUROPEAN CAPPUCCINO

First, a portion of cappuccino topping mix (or lightener) is dispensed, then layered on top is a small serving of strong coffee.

1. Replace product in the soup (or international coffee) canister with the lightener or cappuccino topping mix.

2. Enter the Supervisor code: Press . The display shows: ENTER CODE. You must enter the four-digit supervisor code within 6 seconds to gain access.

   NOTE
   A new machine has a factory-set supervisor code of 0000.

When you have entered the right code, you will hear two beeps and see SUPERVISOR in the display. Press .

3. Reconfigure the machine:
   a. Press then press until the display shows CONFIGURE.
   b. Press . The configuration code is displayed: WXYZ, where W = the machine type, X = 6th product configuration, Y = brewer configuration, and Z = canister mapping. You will be changing the number represented by X. The only way to do that is to change all four numbers, so at this time write down your configuration code so you will know where to start if you make a mistake.
   c. Replace "X" as follows:

<table>
<thead>
<tr>
<th>If your current value of X is:</th>
<th>Change it to:</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>5</td>
</tr>
<tr>
<td>2</td>
<td>6</td>
</tr>
<tr>
<td>3</td>
<td>7</td>
</tr>
<tr>
<td>4</td>
<td>8</td>
</tr>
</tbody>
</table>

For example: If your current configuration code is 1234, you will enter the numbers 1634. Your new drink will be selected with the H key. Valid selections are H3 (black) and H4 (with sugar). After the reconfiguration, timers for the topping mix or lightener are under the J selection, and the timers for the coffee serving are under the H selection. Now, you need to alter the water throw times for the two selections. Consult the throw time tables for suggestions on a starting point for your new drink.
COLLECTING WATER THROWS

National Vendors recommends the factory default times be used for water throws to ensure proper mixing. Table W1 gives the factory default water throw times for the various size cups and product selections.

**WARNING**

Water is **HOT**! Be careful.

For a non-brewed selection, collect the water throws as follows:

1. Place a cup in the cup delivery station.
2. Ensure the merchandiser is using the factory defaults for the cup sizes (refer to PRODUCT CONFIGURATION).
3. Initiate the water throw for a selection.
4. Remove the cup and pour the water into a graduated cylinder.
5. Refer to table W1 for the correct volume of water.
6. Adjust the water valve for that selection and repeat steps 3 through 5 until the correct volume of water is thrown.

For a brewed selection, collect the water throws as follows:

1. Remove water supply hose from the brewer as shown on the next page.
2. Place the end of the hose in a graduated cylinder.
3. Ensure the merchandiser is using the factory defaults per table W1 for the cup sizes (refer to PRODUCT CONFIGURATION).
4. Initiate the water throw for a selection.
5. Refer to table W1 for the correct volume of water.
6. Adjust the water valve for that selection and repeat steps 3 through 5 until the correct volume of water is thrown.

SET PRICES FOR INDIVIDUAL SELECTIONS

For this procedure, we will assume that the merchandiser is set up to vend two different sizes of cups. Also, the machine is configured to allow customers to vend a cup only (no drink). Here is an example of how to set prices for several different selections in this machine:

HELPFUL HINT
If most of the prices in your machine will be the same, perform the SET ONE PRICE FOR THE ENTIRE MACHINE procedure, then return to this procedure to set those prices which will be different.

1. Press \[\text{ }\]. The display shows the maximum and minimum prices currently set in the machine.

2. Either press \[\text{ }\] to scroll through the selection list until you find the selection number you want.

   OR

   Go directly to the desired selection by pressing its letter.

   To help you understand, here is an example. First, set the price for the regular size \(C\) selection to $0.65. Press \(0C\), or \[\text{ }\] until . . .

3. . . . the display shows \(C\) .55. (The price for the \(C\) selection is currently at $0.55.) Enter the new price (65 cents) using the number keys.

   Now, set the price for the large size \(D\) selection. Press \(1D\), or \[\text{ }\] until . . .

4. . . . the display shows \(1D\) .75. This is the \(D\) selection price for the large size cup (the "1" means the large cup).

5. CONTINUE.
SET THE PRICE FOR A CUP ONLY

1. Press \[ \text{-} \] \[ \text{UP} \], then press \[ \text{-} \] \[ \text{DOWN} \] until the display shows \( 2 \ XX \). "XX" represents the price for a cup only.

2. Enter the new price using the number keys.

3. CONTINUE.

SET ONE PRICE FOR THE ENTIRE MACHINE

1. Press \[ \text{-} \] \[ \text{UP} \]. The display shows \( ** \ XX \ YY \). This is the maximum (XX) and minimum (YY) prices currently set in the machine.

2. Press \[ \text{EDIT} \]. The display shows \( ** \).

CAUTION

Setting all prices in the machine will ERASE currently set prices. If you are sure you want to do this, go to the next step. If not, go to step 5.

4. Enter a new price.

5. CONTINUE.
EURODRINK OPERATOR’S GUIDE

SET ONE PRICE FOR ALL REGULAR SIZE DRINKS

1. Press . The display shows ** XX YY. This is the maximum (XX) and minimum (YY) prices currently set in the machine.

2. Press 0 (on the selection switch panel) and . The display shows 0*

CAUTION
Setting these prices will ERASE currently set prices. If you are sure you want to do this, go to the next step. If not, go to step 5.

3. Enter a new price.

4. CONTINUE.

SET ONE PRICE FOR ALL LARGE SIZE DRINKS

1. Press . The display shows ** XX YY. This is the maximum (XX) and minimum (YY) prices currently set in the machine.

2. Press 1 (on the selection switch panel) and . The display shows 1*

CAUTION
Setting these prices will ERASE currently set prices. If you are sure you want to do this, go to the next step. If not, go to step 5.

3. Enter a new price.

4. CONTINUE.
SET THE TIME

1. Press \[ \text{TIME} \]. The display shows \text{TIME H.MM}. "H.MM" is the time of day currently set in the machine.

2. To change the time, just enter the time with the number keys using a 24-hour format (1300 = 1:00 pm).

   **NOTE**
   
   The new time will be displayed, but not updated in the system until you press an arrow key or \[ \text{EDIT} \].

3. CONTINUE.

SET THE DAY OF THE WEEK

1. Press \[ \text{DATA} \], then press \[ \text{DATA} \] until the display shows \text{@SMTWTF}. The currently set day of the week will be flashing. If it is correct, CONTINUE.

2. To change the day, press \[ \text{EDIT} \] until the correct day is flashing.

3. CONTINUE.

SET THE DATE AND YEAR

1. Press \[ \text{DATA} \], and press \[ \text{DATA} \] until the display shows \text{MM/DD YY}. "MM/DD YY" is the month, date, and year currently set in the machine. The slash (/) means that the U.S. date format is being used.

2. If desired, enter a new month, date, and year with the number keys.

   • To change to the European date format (DD-MM YY), press \[ \text{EDIT} \]. The display is now shown with the date before the month, and the slash (/) is replaced by a dash (-) to avoid confusion.

3. CONTINUE.
EURODRINK OPERATOR’S GUIDE

CUSTOM TIME INTERVALS

Times when normal vending is suspended in favor of special cases. For example, coffee could be discounted before working hours in the morning to favor early-arriving employees.

SET TIME-OF-DAY INHIBITED VENDING

Vending can be inhibited up to four times a day. This is useful when you don’t want the machine used for any reason.

1. Press \[ \text{INHIB} \] then press \[ \downarrow \] until the display shows \[ \text{INHIB} \] - - - - - -.

2. Go to the TIME INTERVAL EDITING procedure for an example of how to set up time-of-day inhibited vending.

SET TIME-OF-DAY FREE VENDING

Vending can be free up to four times a day.

1. Press \[ \text{FREEV} \] then press \[ \downarrow \] until the display shows \[ \text{FREEV} \] - - - - - -.

2. Go to the TIME INTERVAL EDITING procedure for an example of how to set up time-of-day free vending.

SET TIME-OF-DAY DISCOUNT VENDING

Vending can be discounted up to four times a day. For example, this can be used to favor early-arriving employees.

1. Press \[ \text{DISCT} \] then press \[ \downarrow \] until the display shows \[ \text{DISCT} \] - - - - - -.

2. Go to the TIME INTERVAL EDITING procedure for an example of how to set up time-of-day discount vending.
TIME INTERVAL EDITING

You can select up to four times of day for each special vending period.

NOTE
If two or more of these time periods overlap, the interval with the highest priority will overrule the other(s). This order of precedence is:

1. INHIBIT
2. FREEVEND
3. DISCOUNT

For example, if a DISCOUNT time period is scheduled before the end of an INHIBIT time period, DISCOUNT does not begin until the INHIBIT interval has ended.

The time interval editing procedure is almost the same for the INHIBIT, FREEVEND, and DISCOUNT intervals. There is one difference for the DISCOUNT time interval, so that interval will be shown here.

1. The display shows DISCT 1234. Press the number of the time interval you want to edit, or to edit time interval 1 (we'll use interval 1 for this example).

2. The display shows 1.DISCT ON or 1.DISCT OFF. This display tells you whether your time interval (represented by X) is on or off. Press to change the condition of the time interval.

   NOTE
   If you turn an interval ON, it must be edited. You can edit a time interval now, then turn it OFF until later.

3. Press The display shows DISCT XX. This is the discount percentage for this period. Enter a discount percentage of 25 with the number keys.

4. Press The display shows STRT X.XX "X.XX" is the currently set start time. Enter a new start time (24-hour format) for this interval. To enter the time for 3:30 pm, enter 1530.
5. Press \[ \text{[up arrow]} \]. The display shows \text{1.STOP XXX}. "X.XX" is the currently entered stop time. Enter a new stop time (24-hour format) for this interval. To enter a stop time of 6:00 pm, enter \text{1800}. You have now established a 25% discount that starts at 3:30 pm and ends at 6:00 pm.

6. Press \[ \text{[up arrow]} \]. The display shows \text{1.@- - - - - -}. The dashes represent the days that this time interval is active. Pressing number keys 1 through 7 switches the days on/off. The days you select will appear in the display. Press \text{2, 4, and 6}. The display shows \text{1.@-M-W-F-}, meaning that the discount interval is only active on Monday, Wednesday, and Friday.

7. Press \[ \text{[up arrow]} \]. The display shows \text{1.- - - - - -}. The dashes represent the selections affected by this time interval. Press the appropriate letter key to turn the selections ON or OFF. \text{NOTE} Selections not vended by your machine will not be displayed. Press \text{A, B, F, and H}. The display shows \text{1.AB-F-H}.

8. Press \[ \text{[up arrow]} \]. The display shows either:

\begin{itemize}
  \item \text{1.MESG OFF} There is no custom message selected.
  \item \text{1.MESG X} This means that custom message \text{X} (1 through 8) will be displayed during this time interval. Press the number key of the message you want displayed. Pressing \text{0} turns the message OFF for this time interval.
\end{itemize}

(You can also press \text{EDIT} to scroll through the message list.)

\textbf{YOU CAN SET UP THE CUSTOM MESSAGE BY FOLLOWING THE CUSTOM MESSAGE EDITING PROCEDURE.}

9. CONTINUE.
SELECT A STANDBY MESSAGE

1. Press \[ \text{STANDBY} \] then press \[ \text{Down} \] until the display shows \text{STANDBY MX}.

\text{"X" represents the current message number selected for the standby message. Two dashes mean that the factory-set message is selected.}

2. To select a message, just press the corresponding number (1 through 8). To display the factory-set message, press 0.

\text{OR}

Press \[ \text{EDIT} \] to scroll through all eight messages and the factory-set message.

3. CONTINUE.

SELECT AN OUT-OF-SERVICE MESSAGE

1. Press \[ \text{Out of Service} \] then press \[ \text{Down} \] until the display shows \text{SERVICE XX}.

\text{"XX" represents the current message number selected to display when the machine is out-of-service. Two dashes mean that the factory-set message is selected.}

2. To select a message, just press the corresponding number (1 through 8). To display the factory-set message, press 0.

\text{OR}

Press \[ \text{EDIT} \] to scroll through all eight messages and the factory-set message.

3. CONTINUE.
SELECT A FREEVEND MESSAGE

1. Press \( \text{6} \) then press \( \text{1} \) until the display shows \text{FREEVEND XX}. "XX" represents the current message number selected for the message that displays when the machine is in the freevend mode. Two dashes mean that the factory-set message is selected.

2. To select a message, just press the corresponding number (1 through 8). To display the factory-set message, press \( \text{0} \).

3. **OR**

4. Press \( \text{EDIT} \) to scroll through all eight messages and the factory-set message.

3. CONTINUE.
EDIT CUSTOM MESSAGES

1. Press \[8\] and press \[\downarrow\] until the display shows \textit{EDIT MSG'S.}. Press the number of the message you want to edit. \textit{MESSAGE X} is displayed (X represents the message number you pressed).

2. Press \[\text{EDIT} \]. The message text is displayed with the first character flashing.

3. To view the message, press \[\ast\]. The message scrolls across the display. To stop the scrolling, press \[\text{EDIT} \].

4. When the character you want to change is flashing, either enter it directly, or use \[3\] and \[6\] to step through the character set until the desired character is displayed. Use the arrow keys to highlight different characters. See the section on the next page for an explanation of special keys and the character set.

\textbf{SHORTCUT}

Instead of stepping through the whole character set to enter a letter that is not on your keypad, enter one close to the one you want, then step to it. Example: If you want to enter an \textit{L}, first press \textit{J} on the selection switch panel. Then press \[3\] twice. Your \textit{L} should now be displayed.

THE END OF MESSAGE CHARACTER

This is the most important character in your message, because it tells the machine when the message is ended. If you don’t use this character, your message will be followed by a bunch of zeros. This character can be selected either from the character set or by a direct key entry (see the next page).
EURODRINK OPERATOR’S GUIDE

ENTERING YOUR MESSAGE

You will be using a combination of special keys and the keys on the selection switch panel to enter your message. Pressing the keys on the selection switch panel will enter the character shown on that key. Most of the keys on the service keypad have a special purpose to help you create and edit your messages:

- **1** - Inserts an `R` at the flashing character.
- **2** - Inserts a space at the flashing character.
- **3** - Deletes the current character and closes up the space.
- **4** - Deletes the current character and leaves the space.
- **5** - Enters the special "end of message" character, which denotes the end of the message.
- **6** - Steps forward and backward through the message, one character at a time.
- **7** - Steps forward and backward through the character list, one character at a time.
- **8** - "Pages" through the message, ten characters (one screen) at a time.
- **9** - Inserts an `S` at the flashing character.
- **0** - Inserts a `T` at the flashing character.
- **A** - Repeats the letter to the left of the flashing character.
- **B** - Inserts a space at the flashing character.
- **C** - Deletes the current character and closes up the space.
- **D** - Deletes the current character and leaves the space.
- **E** - Enters the special "end of message" character, which denotes the end of the message.

This is the end of message character.
TEST VEND SELECTIONS AND VERIFY CREDIT ADDED

1. Press \[\text{TEST} .00\] the display shows TEST .00. You may now test vend selections.

2. To test vend selections without dropping a cup, press \[\text{EDIT} \]. The display shows TEST.NC .00. No cups will drop during the rest of your test vend session. If desired, you may place money in the machine.

In either case, if you insert money into the machine, the zeros in the display will be replaced with the amount of the credit.

**NOTE**
You may make one more test vend if you close the door while still in TEST VEND mode.

3. CONTINUE.

TEST THE DISPLAY

1. Press \[\text{DSPL TEST}\] until the display shows DSPLY TEST.

2. Press \[\text{DSPL TEST}\] to light all display segments and the "DRINK BEING SERVED" light; press \[\text{DSPL TEST}\] to turn them off.

3. Pressing a number key on the maintenance keypad, or any key on the selection switch panel causes all segments to display that character.

**NOTE**
To help differentiate the two keypads, a number from the maintenance keypad has an apostrophe after it: \[1'.\] A number from the selection switch panel has a period after it: \[1..\]

4. CONTINUE.
TEST THE CUP MECHANISM

1. Press \[ \text{[button]} \], then press \[ \text{[button]} \] until the display shows \text{CUP TEST}.

2. You can test the cup mechanism one of several ways:

   a. Press \[ \text{[button]} \] or \[ \text{[button]} \]. A cup is dispensed from the cup ring.

3. CONTINUE.

TEST THE AUTOMATIC DOOR (OPTIONAL)

1. Press \[ \text{[button]} \], then press \[ \text{[button]} \] until the display shows \text{DOOR TEST}.

2. Press \[ \text{[button]} \] to test the automatic delivery door. The door will open, then close after one second.

3. CONTINUE.

TEST THE WHIPPERS

1. Press \[ \text{[button]} \], then press \[ \text{[button]} \] until the display shows \text{WHIP TEST}.

2. Press the whipper number (1=whipper below main condiment mixing bowl, 2=soup whipper, or 3=chocolate whipper) you want to test.

   OR

   Press the letter of a selection containing a whipper.

   In either case, \text{WHIP X} is displayed while the whipper under test ("X") runs.

3. CONTINUE.
TEST THE AIR COMPRESSOR

1. Press \( \text{Air} \) then press \( \downarrow \) until the display shows \textit{Air Test}.

2. Press \( \text{Air} \) to test the air compressor.

\textbf{NOTE}
If the brewer is in the BREW position at the start of this test, the compressor runs for 18 seconds. This allows you to evacuate a full brewer barrel. Otherwise, it runs for 2 seconds.

3. CONTINUE.

TEST THE BREWER

1. Press \( \text{Brew} \) then press \( \downarrow \) until the display shows \textit{Brew Test}.

2. Press \( \text{Brew} \) to test each brewer position:

\textbf{WARNING}
Keep away from the brewer mechanism while it is operating. Coming into contact with moving parts could injure you.

a. \textit{Brew 'R Brew} The brewer is in the BREW position.

b. \textit{Brew 'R Flip} The brewer is in the FLIP position.

c. \textit{Brew 'R Home} The brewer is in the HOME position.

3. CONTINUE.
EURODRINK OPERATOR’S GUIDE

RINSE ALL MIXING BOWLS

WARNING
Very hot water will be dispensed in this test. Coming into contact with hot water will HURT!

1. Press [ennent] then press [ennent] until the display shows BOWL RINSE.

2. Press [ennent] to rinse all bowls. RINSING is displayed.

3. CONTINUE.

RINSE THE BREWER

WARNING
Very hot water will be dispensed in this test. Coming into contact with hot water will HURT!

1. Press [ennent] then press [ennent] until the display shows BREW RINSE.

2. Press [ennent] to rinse the brewer. The brewer cycles, and RINSING is displayed.

3. CONTINUE.
**FILL THE TANK**

1. Press and then press until the display shows TANK.FILL.

2. Press This clears any tank error and starts filling the tank, if necessary.

**NOTE**

If it is taking a long time to fill the tank AND THERE ARE NO LEAKS, you may see TANK.ERR in the diagnostic list again. Just press again after making sure there are no other problems, such as a restriction in the water inlet line or a clogged water filter.

3. CONTINUE.

**TEST VARIOUS SENSORS AND SWITCHES**

1. Press and then press until the display shows IN.XXXXXX. The X's in the display will be replaced by the following place holders: MKPHL1, defined as follows:

   - M = mug/cup sensor (if equipped)
   - K = freevend keyswitch
   - P = waste pail switch
   - H = high water tank level switch
   - L = low water tank level switch
   - 1 = ring 1 cup sensor switch

2. Actuate each switch or sensor to test its function. As you actuate each input, the display element representing that switch blinks on. Releasing the switch causes that element to blink off again, and be replaced by a dash.

3. CONTINUE.
PAYOUT COINS

1. Press \( \text{NDQ} \). If a dumb mech was selected, the display shows \( \text{NDQ} = 123 \); if an MDB mech was selected the display shows \( \text{PAY} \ 123 \).

2. Press \( \text{FREE} \). A dumb mech pays out one Nickel; an MDB mech pays a coin from tube 1. Press \( \text{DIME} \). A dumb mech pays out one Dime; an MDB mech pays a coin from tube 2. Press \( \text{QUARTER} \). A dumb mech pays out one Quarter; an MDB mech pays a coin from tube 3.

3. To continuously pay out coins, hold down the appropriate key.

4. CONTINUE.

SET FREEVEND OPTIONS

1. Press \( \text{FREE OFF} \) until one of the following is displayed:

   - \( \text{FREE OFF} \) - Normal vending mode. No items are on freevend. A closure on the keyswitch input causes the machine to go out of service.
     - OR -

   - \( \text{FREE ALL} \) - All items are on freevend. The credit display shows \( \text{NO MONEY REQUIRED} \). A closure on the keyswitch input causes the machine to go out of service.
     - OR -

   - \( \text{FREE W/KEY} \) - All items are freevended while there is a closure on the keyswitch input. Normal cash sales are supported when the keyswitch input is open. If the free vend code (selected under SUPERVISOR MODE) is not 0000, the code must be entered first.
     - OR -

   - \( \text{FREE ONCE} \) - A closure on the keyswitch input causes only the next item to be freevended. Coin mechanism errors are ignored. This state is designed for card or token systems where one item is vended per token. Normal cash sales are also supported.

2. Press \( \text{EDIT} \) until the option you want is displayed.

3. CONTINUE
VIEW MACHINE ID NUMBER

1. Press \( \text{View ID} \) then press \( \text{Enter} \) until the display shows \( \text{ID. } XXXXX \). The X's represent the 6-digit machine ID number.

2. CONTINUE.

VIEW NONRESETTABLE SALES AND VEND DATA

1. Press \( \text{View NR$} \). The display shows \( \text{NR$ } XX.XX \). "XX.XX" is a dollar and cents figure showing the total of all sales in the machine. This is a running total, and is not resettable.

2. Press \( \text{View NR} \). The display shows \( \text{NR } X \). "X" is the total number of vends made by the machine. This is a running total, and is not resettable.

3. CONTINUE.

VIEW DATA THREE DIFFERENT WAYS

Paid sales and vends can be viewed three different ways: By whole machine, by selection type, and by individual selection. The first screen of the data item shows its machine total.

- To view the data by selection type, press the letter of the type you want to see. For example, pressing \( \text{A} \) shows you the total sales and vends for the combined regular and large size cups of the A selection. You can then press \( \text{Up} \) and \( \text{Down} \) to see data for all the active selection types.

- To view the data by individual selection, press the letter and number of the selection you want to see. You can then press \( \text{Up} \) and \( \text{Down} \) to see data for all the active selections.

- If viewing data by individual selection, press \( \text{Date} \) to view the date and time of the last vend of that selection.
EURODRINK OPERATOR’S GUIDE

VIEW TOTAL PAID SALES

1. Press $ then press until the display shows **$ XX.XX.

“XX.XX” is a dollar and cents figure showing the total of all PAID sales in the machine (as opposed to unpaid sales like winner and free vends). This is the total since the last time it was cleared.

2. If desired, view this data by cup size and individual selection.

3. CONTINUE.

VIEW CARD READER PAID SALES (NOT SHOWN IF ZERO)

1. Press $ then press until the display shows **$ XXXX.

2. Press . The display shows DBT XXXX. “XX.XX” is the amount of money collected from card reader sales.

3. CONTINUE

VIEW TOTAL PAID VENDS

1. Press $ then press until the display shows ** XX. “XX” is the total number of paid vends for the entire machine.

2. If desired, view this data by cup size and individual selection.

3. CONTINUE

CLEAR ALL RESETTABLE DATA

1. Press . The display shows NR$ XXXX. This is a running total, and is not resettable.

2. Press and hold . Two beeps sound and the display shows CLEARING momentarily, and then changes to FINISHED. All data is cleared.

3. CONTINUE.
CLEAR PAID SALES DATA ONLY

1. Press \[ \text{Main Menu} \] then press \[ \text{Down} \] until the display shows \[ \text{XX.XX} \].

"XX.XX" is a dollar and cents figure showing the total of all PAID sales in the machine (as opposed to unpaid sales like winner and free vends). This is the total since the last time it was cleared.

2. Press and hold \[ \text{Slow} \]. Two beeps sound and the display shows \[ \text{CLEARING} \] momentarily, and then changes to \[ \text{FINISHED} \]. All paid sales data is cleared; other data is not cleared.

3. CONTINUE.

VIEW AMOUNT IN COIN BOX (NOT SHOWN IF ZERO)

1. Press \[ \text{Main Menu} \] then press \[ \text{Down} \] until the display shows \[ \text{CBX XX.XX} \].

"XX.XX" is the dollar and cents amount in the coin box.

2. CONTINUE.

VIEW AMOUNT IN VALIDATOR (NOT SHOWN IF ZERO)

1. Press \[ \text{Main Menu} \] then press \[ \text{Down} \] until the display shows \[ \text{DBV XX.XX} \].

"XX.XX" is the dollar amount in the bill stacker.

2. Press \[ \text{Edit} \] to show the quantities of bills in the stacker. For example, the display shows \[ \text{S01 20} \], meaning that there are 20 dollar bills in the bill stacker. Press \[ \text{Edit} \] again to show the quantities of other bills, such as \$5s, \$10s, or \$20s.

3. CONTINUE.
EURODRINK OPERATOR'S GUIDE

VIEW FREEVEND SALES BY TIME INTERVAL (NOT SHOWN IF ZERO)

1. Press $ then press down until the display shows $00.00.
2. Press EDIT then press down until the display shows 1.FRV 00. This is the total sales for freevend interval 1, shown even if zero.
3. Press down to view intervals 2 through 4.
4. CONTINUE.

VIEW DISCOUNT SALES BY TIME INTERVAL

1. Press $ then press down until the display shows **XX.XX.
2. Press EDIT The display shows 1.DSC 00. This is the total sales for discount interval 1 (not shown if zero).
3. Press down to view intervals 2 through 4.
4. CONTINUE.

VIEW FREE VENDS (NOT SHOWN IF ZERO)

1. Press $ then press down until the display shows $00.00.
2. Press EDIT then press down until the display shows FRV XX.XX.
   “XX.XX” is the total machine-wide freevends, shown even if zero.
3. CONTINUE.
VIEW WINNERS (NOT SHOWN IF ZERO)

1. Press $ then press $ until the display shows $0$ XX.XX.

2. Press $ then press $ until the display shows $WIN$ XX.XX.

“XX.XX” is the total machine-wide winners, shown even if zero.

3. CONTINUE.

VIEW TIME DATA

1. Press $ then press $ until the display shows $TIME DATA$.

2. Press $ The following message scrolls across the display:

   $MAIN:123/1/30:10.13$

   This example shows the latest time interval the main (machine) door was open (1). It was open for 237 minutes, and was opened on January 30 (01/30) at 10:13 am (10.13). Press $ If applicable, similar displays will appear for intervals 2, 3, and 4. Otherwise, go to the next step.

3. Press $ The following message scrolls across the display:

   $LAST POWER 01/30  13.51 FOR 00. 0.23$

   This example shows that the last time the machine lost power was on January 30 (01/30) at 1:51 pm (13.51) for zero days, zero hours, and 23 minutes (00.0.23).

4. Press $ The following message scrolls across the display:

   $LONGS.T POWER 01/30  10.58 FOR 00. 2.47$

   This example shows that the longest time the machine was without power was on January 30 (01/30) at 10:58 am (10.58) for zero days, 2 hours and 47 minutes (00.2.47).
EURODRINK OPERATOR’S GUIDE

5. Press \[ \downarrow \]. The following message scrolls across the display:

**FULL CLEAR 01/30 8.58**
This example shows that the last time resettable sales was fully cleared was on January 30 (01/30) at 8:58am (8.58).

6. Press \[ \downarrow \]. The following message scrolls across the display:

**TIME SET 01/30 9.15**
This example shows that the last time the time or date was set was on January 30 (01/30) at 9:15 am (9.15).

7. Press \[ \downarrow \]. The following message scrolls across the display:

**PRICE SET 01/30 9.42**
This example shows that the last time prices were set was on January 30 (01/30) at 9:42 am (9.42).

8. CONTINUE.

**NOTE**
Refer to VIEW DATA THREE DIFFERENT WAYS to view the date and time of the last vend of that selection.

---

VIEW TOTAL UNPAID SALES

**NOTE**
This does not appear if the total of unpaid sales is zero.

1. Press \[ \$ \], then press \[ \downarrow \] until the display shows \[ \text{0$ XXXX} \].

“XX.XX” is the total unpaid sales (free vends, winner vends, 100% discounts, zero price vends) for the entire machine.

2. If desired, view this data by tray and individual selection.

3. CONTINUE.
VIEW TOTAL UNPAID VENDS

1. Press $5 then press $ until the display shows _0 XX. “XX” is the total number of unpaid vends for the entire machine.

2. If desired, view this data by tray and individual selection.

3. CONTINUE.

VIEW NUMBER OF TEST VENDS (NOT SHOWN IF ZERO)

1. Press $5 then press $ until the display shows TST X. “X” is the number of test vends.

2. If desired, view this data by cup size and individual selection.

3. CONTINUE.

VIEW SALES DATA BY PRICE

You can view the total sales of each separate price in the machine.

1. Press $5 then press $ until the display shows **$ XX.XX.

2. Press $2. The display shows the lowest price followed by the dollar sales of all selections costing that price.

3. Press $ to step through all the prices set in the machine.

4. CONTINUE.
VIEW DIAGNOSTIC MESSAGES

1. Press 🔌. If faults are not present on your machine, NO ERRORS is displayed.

2. The following displays will appear when the appropriate fault condition exists.

Press 🔌 to display all applicable fault messages:

KEYPAD XY —“Key(s) “X” and “Y” are stuck. Try unsticking keycaps or replacing key membrane.”

ROM ERROR — ROM checksum error. Replace EPROM or main controller assembly.

RAM ERROR — RAM error. Attempt RAM clearing by pressing CLEAR key. Replace RAM or main controller assembly.

CONFIG ERR — Configuration error. Recheck configuration settings.

TANK ERR — Tank failed to be filled or refilled.

RING 1 2 — The cup ring is jammed (ring 1 and/or 2)

MOTOR 1A 1B — Cup turret motor 1A or 1B is jammed. Remove all cups and close door. Perform the cup test.

NO CUPS 1 — Out of cups.

BREW JAM — The brewer is jammed.

WASTE PAIL — The waste pail is full.

LOW WATER — The water level in the tank is low.

COLD TANK — Water is too cold to vend.

NO SENSOR — Illegal temperature reading. Check tank sensor. Check harnessing for broken or bad connections.

WHIP 1 2 3 — Whipper motor failure (motor 1, 2 or 3)

DOOR JAM — The automatic delivery door is jammed.

CHK PRICES — Illegal price detected.

LOCKS SET — All selections are locked (see PRODUCT CONFIGURATION).

NO MECH — Coin mech not detected - machine will not operate if configured for coin mech.

MECH COMM — Incomplete coin mech communications -- check harness.

MECH SENSOR — Coin mech reporting a bad tube sensor - replace mech.
MECH.JAM

One or more coin tubes are jammed. Pay a coin from each tube until the jam is cleared.

OR

Coin is jammed in the acceptor section. Check the coin mechanism for a jam in this position. Insert coins and cycle machine power OFF and then ON.

MECH.ROM

Replace the coin mechanism.

MECH.ACCEPT

Coin mechanism acceptor section is unplugged from the main body of the coin mech. Connect the cable and cycle machine power OFF and then ON.

OR

The vending machine is telling the coin mech not to accept any coins.

NONE READY

All selections are out of service. Check Time of Day inhibits and lockouts.

DBV.COMM

Incomplete bill validator communications -- check harness.

DBV.SENSOR

One of the sensors in the bill validator has failed. The unit will disable itself until the error is corrected. Check for bill stuck in the acceptance path. If no bill is present, replace the validator. Cycle machine power OFF and then ON.

DBV.ROM

ROM checksum failure. The unit will disable itself until the error is corrected. Replace the validator.

DBV.JAM

A bill is jammed in the acceptance path. The unit will disable itself until the error is corrected. Remove bill stuck in the acceptance path. Cycle machine power OFF and then ON.

DBV.MOTOR

One of the motors has failed. The unit will disable itself until the error is corrected. Check for bill stuck in the acceptance path. If no bill is present, replace the validator. Cycle machine power OFF and then ON.

DBV.STACKR

The stacker is open or removed. The unit will disable itself until the error is corrected. Install the stacker correctly.

OR

The stacker is full of bills. Remove bills from the stacker.

DBV.ACCEPT

The vending machine is telling the bill validator not to accept any bills. Check the enabled channels of the bill validator.

CARD.F.COMM

Incomplete card reader communications - check cables. The card reader is not operational.

CARD.COMM

Incomplete card reader communications. Check cables or replace unit.

CARD.ERR

Card reader is indicating it has a problem.

CARD.F.ERR

Card reader is indicating it has failed. Replace unit.

CARD.ERRXX

Card reader has an error and indicates code XX. The code is defined by the card reader manufacturer. To correct, contact card reader manufacturer. The unit is still operational.
EURODRINK OPERATOR’S GUIDE

**CARD.F.ERRXX** ... Card reader has failed and indicates code XX. The code is defined by the card reader manufacturer. To correct, contact card reader manufacturer.

**CARD.F.JAM** ....... Card reader has failed because card is jammed in the unit. Remove the jammed card.

**CARD.SERV** ......... Card reader requires service. The unit is still operational.
CHANGE MACHINE ID NUMBER

1. Follow the steps in GAIN ACCESS TO THE SUPERVISOR MODE.

2. Press $\downarrow$ then $\downarrow$ until the display shows $ID \ \ XXXXXX$. The X’s represent the 6-digit machine ID number.

3. Using the number keys, enter a new ID number.

4. CONTINUE.

VIEW THE WATER TANK TEMPERATURE

1. Press $\uparrow$. The display shows $TEMP \ XX \ F$. This is the current water tank temperature (in degrees F or C, depending upon your choices).

2. CONTINUE.

VIEW THE CURRENT SOFTWARE VERSION NUMBER

1. Press $\uparrow$ then press $\downarrow$ until the display shows $VER \ XXXX$. This is the current software version number.

2. CONTINUE.

VIEW THE MACHINE CONFIGURATION CODE

1. Press $\uparrow$ then press $\downarrow$ until the display shows $CONF \ WXYZ$. This is the machine configuration. (See PRODUCT CONFIGURATION for an explanation of "W", "X", "Y", and "Z".

2. CONTINUE.
EURODRINK OPERATOR’S GUIDE

VIEW THE SELECTION CONFIGURATION

1. Press , then press until the display shows 0.ABCDEFGH. This shows which selections are available for sale and setup for regular size drinks. If one or more of the letters in the display are replaced by dashes (-), that selection is unavailable.

2. Press . The display shows 1.ABCDEFGH. This shows which selections are available for sale and setup for large size drinks. If one or more of the letters in the display are replaced by dashes (-), that selection is unavailable.

3. CONTINUE.

VIEW CUP ONLY STATUS

1. Press , then press until the display shows CUPVND ON or CUPVND OFF. This shows whether or not the machine will vend a cup only (no drink).

2. CONTINUE.

VIEW THE SELECTED WHIPPING OPTION

1. Press , then press until the display shows either:

   J WHIP (Selections programmed for optional whipping will be whipped only if J is pressed.)

   OR

   J NO WHIP Selections programmed for optional whipping will NOT be whipped only if J is pressed.

2. CONTINUE.

VIEW THE AUTOMATIC DELIVERY DOOR OPTION

1. Press , then press until the display shows either DOOR ON or DOOR OFF. This shows whether or not the optional automatic delivery door is enabled.

2. CONTINUE.
SANITATION

Basics

INTRODUCTION

Anybody who services vending machines must use proper sanitizing procedures. Health regulations require that hands be clean when cups, commodities, and food-contact parts are handled or serviced.

In addition, Federal and State Health Departments require regular cleaning and sanitizing procedures for food contact parts.

The information in this section will explain how to clean and sanitize the merchandiser on a day to day basis. A clean and well maintained merchandiser will provide a better product and greater safety for your customers.

CLEANING AND SANITIZING -- WHAT'S THE DIFFERENCE?

Clean means “free of visible soil”. In cup vending machine servicing, cleaning is also done to maintain product quality and to remove food soils, oils, and mineral stains that could affect product taste, aroma, and appearance.

Sanitizing means the reduction, to safe levels, of the number of disease-causing bacteria that remain on the surface after cleaning. Therefore, cleaning and sanitizing are done in separate steps, as prescribed by health regulations and good industry practice.

When you sanitize you create a healthy and hygienic condition. This leads to wholesome food, which in turn leads to satisfied customers.

SANITIZING IS NO SUBSTITUTE FOR A GOOD CLEANING

HOW DO I SANITIZE?

You can sanitize by using either of these two methods:

Chemicals: The object to be sanitized is treated with a bactericidal compound.

Heat: Raise the temperature of the object high enough to kill bacteria. Water must be at least 170°F.

Hot brew water (if available) is an acceptable sanitizer. When food contact surfaces are washed and/or rinsed, use the hot water available in the machine.

Turn the machine off before using water on the machine.

In either case, the object must be thoroughly clean and completely rinsed in order for the sanitizing process to work. Caked-on soils not removed by cleaning, for example, may shield bacteria from a sanitizing solution.
A GOOD PLACE TO START -- YOUR SANITATION KIT

You need to be sure that each machine is clean, safe, and functioning when you leave it. In order to properly do this, you need to have a complete set of the right tools. In addition to the screwdrivers, pliers, and test equipment necessary to repair a machine, you need to have the tools to clean the machine.

Here is a checklist of the items needed for a good sanitation kit:

- Sanitation pail
- Tube and nozzle brushes for food contact surfaces
- Utility brush for dry spillage around canisters, etc.
- Disposable towels, wet-strength and lint-free

**NOTE**
Wiping with towels can re-contaminate sanitized food-contact parts.
Therefore, towels should not be used to dry food-contact surfaces.
Instead, these parts should be air dried.

- Spray detergent, diluted to desired strength
- Urn cleaner packets for coffee stains and oils
- Odor control chemicals for pails
- Replacement parts (if the exchange method is used)
- Cabinet polish or window cleaner for the outside of the machine

Feel free to add some items to this list. For example, you may want to use a portable vacuum cleaner.
SANITATION PROCEDURES

Refer to the recommended cleaning and sanitation interval table on the final page of this section. For each item, complete the procedure as outlined here.

Food-Contact Parts

NOTE
All food-contact parts must be cleaned and sanitized. Air dry, do not wipe dry.

Ingredient Canisters - Empty and wash the canisters, augers, and spouts. Sanitize with hot water and allow to air dry completely before returning to cabinet.

Mixing Bowls - The inside of all mixing bowls can be rinsed by performing the “Bowl Rinse” operation as outlined in the Programming section of this manual.

If needed, remove mixing bowls from the dry ingredient shelf. Wash the mixing bowl lids and sanitize with hot water. Allow to completely air dry before reassembling.

Whipper Lids and Impellers - Remove lids and impellers from the whipper housings, wash the lids and impeller housing. Sanitize with hot water and allow to air dry before reassembling.

Beverage Discharge Nozzles - Disconnect the beverage dispensing tube from the nozzles. Remove the nozzles from the mounting bracket. Remove the cap from the nozzle, wash clean and sanitize the nozzles and cap. Refer to the tubing connection diagram for proper routing.

Brewer, Brewer Basket, and Brewer Funnel - The tubing and brewer may be sanitized by performing the BREW RINSE operation as outlined in the programming section. The machine features an automatic brewer sanitizing feature also described in the programming section.

At times, it may be necessary to wash and sanitize the individual brewer parts. If so, disconnect the tubes from the brewer manifold. Remove the brewer barrel and manifold assembly from its support. Remove the brewer basket and funnel assemblies.

Thoroughly wash all parts using soap and water. Sanitize by rinsing thoroughly with hot water.

Coffee Chutes - Remove the metal chute(s), wash clean, and sanitize by rinsing with hot water. Air dry before reinstalling.

Condiment Chute Assembly - Remove the condiment chute and cover from the condiment canisters. Thoroughly wash all parts using soap and water. Sanitize by rinsing thoroughly with hot water.
EURODRINK OPERATOR'S GUIDE

Non Food-Contact Parts

Brewer Mechanism Cleaning - Remove the brewer mechanism from its mounting and rinse with the spray hose.

Cup Delivery Compartment - Remove the compartment from the merchandiser. Wash clean and rinse with hot water.

Exhaust Fan Filter - Remove the filter from its housing. Wash with soap and water, rinse, wring dry, and replace into housing.

Grounds Pail - Empty and rinse the grounds pail. Reline the pail with a clean plastic liner.

Waste Pail - Empty, wash, and rinse with hot water. Sprinkle detergent powder in the bottom of the pail to help control odors.

Ingredient Rinse Tray - Remove product canisters. Wash and rinse with hot water. Allow to air dry.

OVERALL CLEANING

Inspect your merchandiser both inside and out. Be sure to check corners and all less visible parts of the merchandiser.

Clean where needed.

Allow the inside of the cabinet to dry thoroughly before you close the door.

National Vendors recommends using the following supplies:

A commercial glass cleaner on the glass in the cabinet door.

A mild detergent and warm water on the cabinet, brewer, and other NON ELECTRICAL components.

CAUTION

The plastic parts in your merchandiser should be cleaned with mild detergent and warm water. The use of other cleaning agents may damage the material, and should be avoided.

PREVENTIVE MAINTENANCE CLEANING

Periodically, you should visually inspect your merchandiser's hot water tank for excessive lime and scale buildup. This buildup on the tank walls, water valves, and heater element will vary dramatically, depending upon water quality. You should develop a cleaning and deliming schedule based on the apparent local water quality.

NOTE

To aid in removing scale from your merchandiser, National Vendors has a service kit available: part number 6400080. In addition, if your machine has the Everpure water inlet filter system option, a second kit (part number 6400086) is also available.

APPENDIX A. THE OPTIONAL PRINTER

The printer allows you to obtain a hard copy of data from the Hot Drink Center. This data includes:

• Machine ID number
• Time and date of printout
• Price of each selection
• Mug discount
• Dollar value of sales for all selections
• Sales counts for all selections

Printing is very simple:

1. Open the machine door and locate the printer cable. (You may need to open the monetary panel.)
2. Make sure the baud rate selected in the MACHINE CONFIGURATION function agrees with your printer's baud rate.
3. Connect the printer to the printer cable.
4. Turn the printer power ON.
5. The display shows PRINTER. You are now in the printer mode.

NOTE

Pressing causes you to leave the printer mode. To reenter printer mode, press while the printer is connected and turned on.

6. To print all prices, press . The printer begins printing. the machine display scrolls "**" until the data has been downloaded, then it returns to PRINTER. The printer may continue printing for a while longer.

7. To print product configuration, press . The printer begins printing. the machine display scrolls "**" until the data has been downloaded, then it returns to PRINTER. The printer may continue printing for a while longer.

8. To print sales information, press . To customize your printout, refer to the MACHINE CONFIGURATION function. The printer begins printing. the machine display scrolls "**" until the data has been downloaded, then it returns to PRINTER. The printer may continue printing for a while longer.

9. When the printer is unplugged or turned off, the machine display will once again show the normal standby message.
APPENDIX B. THE INFRARED MUG/CUP SENSOR

The infrared mug/cup sensor can sense the presence of a mug or cup without using moving parts.

Indicator light

The sensor is equipped with an indicator light. This light will help you get the best results from the infrared mug/cup sensor.

Under these conditions:
- Machine door open
- Cup station in place
- No cup in the station

The indicator light should be off. If it is on, it is indicating improper cup station alignment or excessive sensor sensitivity.

Under these conditions:
- Machine door closed
- Cup station in place
- No cup in the station

Press any letter on the selection switch panel, for example, A. Only the letter A should be showing in the message display. If “A MUG” is displayed, it indicates one or more of the following:
- Improper cup station alignment
- Excessive sensitivity (the sensor is sensing the delivery door)
- Cup station lens is not clean

Cleaning

As indicated in the Sanitation section, you should remove the cup station to clean it. Pay particular attention to the dark colored infrared mug/cup sensor lens, which is part of the cup station. If it is not thoroughly cleaned, the sensor will not work properly.

CAUTION

Do not get liquid inside the sensor unit.

Cleaning the infrared mug/cup sensor unit itself is not usually necessary. If it does require cleaning, just wipe it with a damp cloth.
EURODRINK OPERATOR'S GUIDE

Calibration

1. Remove the plastic cap in the rear of the sensing unit, exposing the potentiometer adjusting screw, as shown in figure B1.

2. Turn the screw clockwise to increase sensitivity of cup detection, or counterclockwise to decrease sensitivity.

3. Calibrate the sensor:
   
   **CAUTION**
   Do not adjust sensitivity too far, or unreliable sensing could result.

   a. Using a piece of **WHITE** poster board or heavy cardboard, make a 5" x 5-5/8" target.

   **NOTE**
   IT IS VERY IMPORTANT THAT THIS MATERIAL BE WHITE.

   b. Place the target in the cup station just beyond the cup deflectors (see figure C-2). The target should be standing vertically; not tilted forward or backward.

   c. With the target in place, turn the adjusting screw **clockwise** very slowly until the indicator just turns ON.

   d. Turn the adjusting screw **counterclockwise** very slowly until the indicator just turns OFF.

4. Replace the plastic cap.

5. Insert a mug into the cup station in the vending position and check to see that the red indicator light is ON.

This calibration will be adequate for most cups or mugs. In some cases, a slightly more sensitive setting is needed if the cup or mug is a dark color.
VIEWING REAR OF SENSOR ASSEMBLY

Figure B1

Figure B2
APPENDIX C. DEX/UCS INTERFACE OPERATION

Connect your portable data collection device (PDCD) to the harness hanging inside the monetary door, and operate it per its instructions.

SELECT DATA TRANSFER METHOD:

1. Press \[ \text{\#} \] The display shows: \textit{ENTER CODE}. You must enter the four-digit supervisor code within 6 seconds to gain access.

   \textbf{NOTE}
   
   A new machine has a factory-set supervisor code of 0000.

   When you have entered the right code, you will hear two beeps and see \textit{SUPERVISOR} in the display.

2. Press \[ \text{\downarrow} \] until the display shows \textit{DEX CLR ON} or \textit{DEX CLR OFF}.

   \textit{DEX CLR ON} = Data will be cleared after collection is complete.

   \textit{DEX CLR OFF} = Data will remain in merchandiser memory after collection is complete.

3. Press \[ \text{\edit} \] to switch between the two options.

4. Press \[ \text{\exit} \] to exit.

This procedure does not need to be repeated unless you desire to change the data transfer option. However, it might be prudent to check the setting prior to download to ensure unintentional clearing of data.

DOWNLOAD DATA:

1. Press \[ \text{\6} \] The display shows \textit{DEX MODE} while data is being transferred.
APPENDIX D. MODIFY CANISTER TO VEND 12 OZ. CUPS

Proceed as follows:

1. Remove all cups, then remove the turret center and turret base assembly from the canister.

2. Break off all 8 tabs on the bottom of the turret base as shown.

   **NOTE**
   You will no longer be able to vend smaller cups from this canister! To return to vending smaller cups you must replace the modified turret base with an original turret base (part number 6233048) from National Vendors Parts Department.

3. Replace the turret center and turret base in the canister and load cups.

4. Drop a cup. If it drops properly, you are finished with the procedure, if not, continue with step 5.

5. Remove all cups, then remove the canister from the cup mechanism assembly.

6. Remove the funnel, replace the canister, and reload cups.

7. Drop a cup. If it drops properly, you are finished with the procedure, if not, continue with step 8.

8. Order a 5 oz/18oz cup ring (part number 6233120) from National Vendors Parts Department.
Appendix E. Clean The Hot Water Tank

Some smell and/or taste problems may occur in new machines. Follow this procedure to clean the hot water tank if you experience problems:

1. If the machine is in service, remove power from the machine.
2. Dissolve 1 tablespoon of common baking soda in a cup of water.

**WARNING**

The water tank may be HOT. Be careful when working on the tank.

3. Loosen or remove the hot water tank lid and pour the baking soda solution into the tank.
4. Apply power to the machine.
5. If the tank is not full, fill it.
6. Allow the tank to reach its operating temperature.
7. Leave the solution in the tank for **AT LEAST** ½ hour. If possible, leave the solution in the tank for 1 hour.
8. Drain the tank.
9. Refill the tank, then drain again.
10. Refill the tank and put the machine back into service.
APPENDIX F. THE FREE VEND KEYSWITCH OPTION

The free vend keyswitch allows someone to set up free vending without needing to open the door.

It is a good idea to establish a free vend code. This will prevent an unauthorized person from setting the machine to free vend, even if they have a key.

1. Press Enter your 4-digit supervisor code. Press .

2. Press again, then press until the display shows FREE XXXX. Enter a 4-digit free vend code.

   NOTE
   To keep the user from having to enter a code, you can enter 0000 as your code. See the steps below for details.

3. Press until you have left the function.

USING THE FREE VEND KEY SWITCH:

If you have set your freevend option to FREE W/KEY:

1. Place your key in the free vend keyswitch and turn it to the right. (If the keyswitch is already turned to the right, turn it to the left, then back to the right.) The display shows: ENTER CODE.

   NOTE
   If your freevend code is set to 0000, you will not see this display. Skip to step 3.

2. Enter your 4-digit freevend code. If you do this successfully within 6 seconds, you will hear two beeps, and the display shows: UNLOCKED.

3. The display shows NO MONEY REQUIRED (or whatever custom message you set up for the freevend period). Remove your key. All vends are free until the keyswitch is turned to the left again.

4. To take the machine off free vend, insert your key, turn the keyswitch to the left, and remove the key.

If you have set your freevend option to FREE OFF or FREE ALL:

1. If the freevend key is turned to the right, the machine will go out of service.
This Merchandiser is warranted for one (1) year against defective parts and workmanship. Any part or parts which are proven to be defective within one (1) year of the date of shipment will be repaired or replaced free of charge when the defective part is returned, with transportation charges prepaid, to the destination designated by the National Vendors Warranty Department.

This warranty applies only to the original purchaser of the Merchandiser and is null and void if the Merchandiser is sold during the period of warranty.

This warranty does not apply to a) electrical components, wiring, or circuits and/or for all mechanical parts or assemblies damaged as a result of operating the Merchandiser at other than the design voltage and frequency specified on the Electrical Rating Tag, or b) in event of vandalism, fire or negligence, or c) incandescent lamps, neon lamps, fluorescent lamps, ballasts, starters or other expendable items or d) when other manufactured components are installed in National Vendors Merchandisers.

National Vendors is not responsible for any cost of service rendered or repairs made by customer or its agents on Merchandiser or parts unless authorization to incur such expense has been given in writing by National Vendors prior to incurring such expense.

THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES EXPRESSED OR IMPLIED, INCLUDING WITHOUT LIMITATION, WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. NATIONAL VENDORS SHALL NOT BE RESPONSIBLE FOR CONSEQUENTIAL OR PUNITIVE DAMAGES. National Vendors neither assumes nor authorizes any person to assume for it any obligation or liability in connection with the sale of said equipment or any part thereof.
