This machine has been engineered to our own rigid safety and performance standards. It has been designed to comply with sanitation and health guidelines recommended by the Automatic Merchandising Health-Industry Council (AMHIC) and it conforms with all other NAMA safety recommendations.

This machine has been manufactured in accordance with the safety standards of both Underwriter’s Laboratories and the Canadian Standards Association. To maintain this degree of safety and to continue to achieve the level of performance built into this machine, it is important that installation and maintenance be performed so as to not alter the original construction or wiring and that replacement parts are as specified in the Parts Manual. Your investment in this equipment will be protected by using this Setup and Operation Manual and the Parts Manual in your operation, service and maintenance work. By following prescribed procedures, machine performance and safety will be preserved.

NOTICE:
This merchandiser is intended to store and vend prepackaged non-perishable product. Do not load with perishable food.

Model 721/722 Setup and Operation Manual

Power Requirements

The merchandiser is supplied with a service cord for the country of use and is terminated in a grounding type plug. The wall receptacle used for this merchandiser must be properly polarized, grounded, of the correct voltage, and rated for outdoor use. Operating the merchandiser from a source of low voltage will VOID YOUR WARRANTY. Each merchandiser should have its own electrical circuit and that circuit should be protected with a circuit breaker or fuse conforming to local regulations.

Voltage Check - Place the leads of a voltmeter across the LINE (LIVE) and NEUTRAL terminals of the wall receptacle. The voltmeter should indicate 110-130 volts ac for 120 volt, 60 Hz locations, or 220-240 volts ac for 230 volt, 50 Hz locations.

Polarity Check - Place the leads of a voltmeter across the LINE (LIVE) and GROUND terminals of the wall receptacle. The voltmeter should indicate 110-130 volts ac for 120 volt, 60 Hz locations, or 220-240 volts ac for 230 volt, 50 Hz locations.

Noise Potential Check - Place the test leads of a voltmeter across the NEUTRAL and GROUND terminals of the wall receptacle. The meter should indicate 0 volts ac. A measurement greater than 1.5 - 2.0 volts ac could result in problems for the merchandiser's electronic circuitry caused by electrical noise.

Any deviation from these requirements could result in unreliable performance from your merchandiser.

FOLLOW ALL LOCAL AND NATIONAL CODES

Site Requirements

This machine is designed to be operated in any location with average temperatures ranging from 0º to 105º F.

This machine is designed to merchandise prepackaged, non-perishable food items. **Not for use with perishable foods.**
Unpack the Merchandiser

Remove all packing materials from the interior of the machine. Keep all documents, warranty cards, etc.

Position the Merchandiser

1. Plan the merchandiser’s location:

   **NOTE**

   It is highly recommended that the merchandiser be anchored to its location to eliminate the possibility of damage and personal injury due to vandalism or tipping.

   a. Where possible, try to find a shaded location; this will help the merchandiser to work more efficiently.
   b. Locate the merchandiser at least four inches away from any wall, so air can circulate to the refrigeration unit.
   c. There should be enough room in front and to the left of the merchandiser for the door to move freely.

2. Refer to the figure below and prepare the merchandiser’s location as follows:

   a. The merchandiser should be anchored securely using the two anchor holes provided in the cabinet base.
   b. The anchors for the machine should be located as shown in the following diagram:

   ![Diagram of merchandiser location](image)

   Dimensions shown in inches.

3. Remove the plastic hole plugs from the anchor holes.
4. Position the merchandiser over the anchor points.
5. Using a spirit level, adjust the legs until the machine is level, both front to back and side to side.

   *If you have a model 721 machine, skip to step 12. If you have a model 722 machine, continue with the next step.*
6. Be sure the machine is located on a smooth, level surface. Any cracks or depressions in the surface must be filled in.

7. Remove the backing from the double sided tape on one side of the cabinet base seal - included with all model 722 vendors.

   **NOTE**
   
   The double sided tape on the cabinet base seal will be attached to the base along the SIDES of the machine, NOT the back and front.

   **NOTE**
   
   Do not lift the machine using the inside trays or the refrigeration shelf.

8. Using the appropriate equipment (appliance dolly), lean the machine to one side far enough to place the cabinet base seal under the machine. Secure the cabinet base seal to the raised side of the base. Push the cabinet base seal under the front and rear of the machine as far as it will go.

9. Gently lower the machine to the ground and lean it in the other direction.

10. Remove the backing from the double sided tape on the other side of the seal. Arrange the cabinet base seal all around the base of the cabinet and secure the cabinet base seal to the raised side of the machine.

11. Gently lower the machine to the ground. The base seal should be even all around the cabinet base without wrinkles or stretched areas.

12. Anchor the merchandiser using the two lag screws and fender washers. DO NOT overtighten the screws; tighten them enough to prevent movement of the machine.
Loading the Merchandiser

1. Place A Tray In The Loading Position

   a. Put both hands on the tray as shown.
   b. Push down on the tray latches with your thumbs.
   c. Pull the tray toward you until you hear and feel the rear tray rollers drop into a cut-out in the top of the guide rail.
   d. Continue pulling the tray forward for another inch. You will then be able to tilt the tray downward into the loading position as shown.
2. Set Up Trays to Vend Products

These instructions will guide you through setting up your trays for vending. You will be asked to determine if your tray can physically hold the products you intend to vend. If not, you will be directed to other procedures which will help you get them set up. Follow these steps for each tray in your machine:

a. Make sure the tray is in the loading position.

b. Is the column wide enough for the intended product? If so, proceed to the next step. Otherwise, set up your tray to vend wider products (below). When you're done, return to step c in this procedure.

c. Will the products fit between the spiral turns? If so, proceed to the next step. Otherwise, change the spiral.

d. Will the product pass under the tray immediately above? If so, proceed to the next step. Otherwise, reposition the tray and guides.

e. Will the product touch products on either side? If not, proceed to the next step. Otherwise, install a product spacer.

f. Load products in the tray.

g. Return the tray to the vending position.

h. Install the price rolls.

i. Install the selection ID numbers.

3. Set Up A Tray To Vend Wide Products

The following steps will help you configure your tray to vend wide products. When you have completed the procedures called out in each step, return to the next step in the procedure. When you are done with the entire wide product steps, return to the set-up procedures above.

a. Remove the tray from the merchandiser and place on a flat surface.

b. Based on the size of the product you want to vend, decide how many spiral positions it will occupy. Please remember that the leftmost spiral in the group must have an even ID number (0, 2, 4, etc.) For example, if a product is three spirals wide, the left spiral will be ID number 0, and the right spiral will be ID number 2. Be careful how wide you set up for, because really wide products could get hung up in the delivery door.

c. Remove the column dividers inside the group. In the example of three spiral positions, you would be removing the dividers between spiral ID numbers 0 and 1, and 1 and 2.

d. If your group only consists of two spirals, replace the rightmost motor with a spiral bearing and gear, and install a gear on the leftmost motor. Skip to step 8.

e. Remove all spirals in the group except the leftmost spiral.

f. Do one of the following:
   • If your group has an OD number of spirals (3, 5, etc.) remove the harnesses from all motors in the group except the leftmost one. To the rightmost motor, connect the harness from the motor immediately to its left.
   • If your group has an EVEN number of spirals (4, 6, etc.) remove the harnesses from all motors inside the group (leave the harnesses connected to the leftmost and rightmost motors).
g. Install a spiral at the rightmost position in your group. Make sure it has the same product capacity and is opposite to the one in the leftmost position.

h. Return the tray to the merchandiser.

i. Electronically couple the motors as needed (see your Programming Guide for information).

j. Return to step c in the Set Up Trays to Vend Products procedure (page 5).
4. Removing a Tray

Study this procedure before you install a tray for the first time; while you are holding the tray you will not be able to see this area. Proceed as follows:

a. Push down on the tray latches with your thumbs.

b. Pull the tray forward until you hear and feel the rear tray rollers drop into a cut-out in the top of the guide rail.

c. Unplug the tray wiring harness from the PC board mounted on the tray guide rail JUST ABOVE the tray you are removing.
d. Lift up on the tray and slide it toward the back. No more than an inch should be needed.

e. The tab near the back of the tray should align with the cut-out in the top of the guide rail as shown.

f. Lift the tray clear of the guide rail and out of the merchandiser.

5. Removing And Installing Column Dividers

a. Push the column divider toward the back of the tray — ①.

b. Lift the column divider clear of the tray — ②.

Install the column divider in the reverse order of removal
Tray harness extension (P/N 1709017) is available from your National Vendors Parts department. The extension will enable you to remove the tray from the machine and still operate the motors and spirals. Connect it as shown:
Model 721/722 Setup and Operation Manual

Changing Tray Configurations

1. Replacing a Motor With a Spiral Bearing

REMOVING A MOTOR:
   a. Disconnect the harness from the motor. See CONNECTING AND DISCONNECTING A MOTOR HARNESS, below.
   b. Remove the spiral. See REMOVING AND INSTALLING SPIRALS (page 11).
   c. Remove the spiral coupler. See REMOVING A SPIRAL COUPLER (page 13).
   d. Remove the motor. See REMOVING AND INSTALLING A SPIRAL MOTOR (page 13).

INSTALLING A SPIRAL BEARING:
   a. Put the gear into position if required in this set-up as shown. See INSTALLING A GEAR (page 14).
   b. Install the spiral coupler. See INSTALLING A SPIRAL COUPLER (page 15).

2. Connecting and Disconnecting a Motor Harness

To avoid breaking the motor circuit board, hold the header on the circuit board whenever connecting or disconnecting a motor harness.

DISCONNECTING A MOTOR HARNESS:
   a. Pull the harness connector away from the circuit board as shown.
   b. Tuck the unused part of the harness out of the way in the trough at the back of the tray.

CONNECTING A MOTOR HARNESS:
   a. Locate the harness connector for the appropriate tray position.
   b. Push the harness connector over the header pins on the motor circuit board as shown.
3. Removing and Installing Spirals

All spirals are the same diameter:

- There are two types of spirals:
  - COUNTER-CLOCKWISE (left hand)
  - CLOCKWISE (right hand)

- Spirals are available in eight different capacities. Four of these are standard, and four are options.

<table>
<thead>

</tbody>
</table>
TO REMOVE A SPIRAL:
   a. Pull forward on the retaining clip and remove the end of the spiral from the spi-
      ral coupler as shown.
   b. Remove the spiral from the tray.

TO INSTALL A SPIRAL:
   a. Pull the bottom of the retaining clip toward the front of the spiral.
   b. Lower the spiral into the tray column and insert the end of the spiral into the spi-
      ral coupler as shown.
   c. Release the retaining clip.

SHOULD I USE A CLOCKWISE OR A COUNTERCLOCKWISE SPIRAL?
   a. The type of spiral used is determined by the column position it will occupy in
      the tray.
   b. Refer to the figure below to find the correct spiral type.
Model 721/722 Setup and Operation Manual

REMOVING A SPIRAL COUPLER:

a. Pinch together the prongs on the end of the spiral coupler as shown.
b. Pull the coupler forward (in the direction of the arrow as shown).

4. Removing and Installing a Spiral Motor:

REMOVING A SPIRAL MOTOR:

NOTE
Some steps may already be completed.

a. Remove the tray. See REMOVING A TRAY (page 7).
b. Disconnect the motor harness. See CONNECTING AND DISCONNECTING A MOTOR HARNESS (page 10).
c. Remove the spiral. See REMOVING AND INSTALLING SPIRALS (page 10).
d. Remove the spiral coupler. See REMOVING A SPIRAL COUPLER (page 11).
e. Lift the motor clear of the tray.
f. Return the tray to the merchandiser. See INSTALLING A TRAY IN THE MERCHANDISER (page 17).

INSTALLING A SPIRAL MOTOR:

a. Remove the tray. See REMOVING A TRAY (page 7).
b. Place the motor in the correct position at the rear of the tray as shown.
c. Place a gear in position if required by this set-up. See INSTALLING A GEAR (page 14).
d. Install a spiral coupler in the proper orientation. See INSTALLING A SPIRAL COUPLER (page 15).
e. Connect the motor harness. See CONNECTING AND DISCONNECTING A MOTOR HARNESS (page 10).
f. Return the tray to the merchandiser. See INSTALLING A TRAY IN THE MERCHANDISER (page 17).
5. Installing a Gear

WHEN ARE GEARS USED?
• Gears are used to mechanically couple the spirals together.
• This happens whenever you have two spirals and only one motor for vending a selection.

WHERE ARE THE GEARS PLACED?
• The gear is placed between the back of the tray and the spiral coupler.

HOW IS THE GEAR ORIENTED?
• There are two possible orientations for the gear:

![Diagram showing two orientations of the gear](image)

• There are two rules to follow when orienting gears:
  
  **RULE 1** - The gears for selections next to each other cannot use the same orientation.

  **RULE 2** - All gears for a single selection must use the same orientation.
6. Installing a Spiral Coupler
   a. Place the gear in position if one is required for this set-up. See INSTALLING A GEAR (page 14).

   WHEN USED WITH A MOTOR:
   b. Hold the motor in place and push the spiral coupler through the motor gear box until it clicks into position. Be sure the spiral couplers are oriented as shown below.

   NOTE
   The motor output shaft opening contains eight facets to allow the spiral coupler to be installed in any one of eight positions.

   WHEN USED WITH A COUPLER BEARING:
   c. Hold the coupler bearing in place and push the spiral coupler through the bearing until the coupler clicks into position. Be sure the coupler is in the proper orientation as shown.
7. Moving a Tray Up or Down

This merchandiser can be adjusted to vend taller products. Some guidelines must be followed:

- Keep in mind that when you increase the product height available to a tray by lowering it, you will be decreasing the product height available to the tray below.
- If a tray is in the lowest position, the tray below it should not be in the highest position.
- If a tray is in the highest position, the tray above it should not be in the lowest position.
- You will need to experiment with various tray positions to get the best results for your products.

**CAUTION**

Trays should not be positioned over an open air discharge vent.

**NOTE**

Tray movement is limited because the tray harness will limit the amount of travel available to the tray guide rails.

Proceed as follows:

a. Remove the tray from the merchandiser. See **REMOVING A TRAY** (page 7).

b. Remove the screw that secures the right tray guide rail to the front guide mounting channel as shown.

c. Tap up on the guide rail and unseat the guide rail tabs from the channel slots.

d. Pull the guide rail away from the front and rear guide mounting channels.

e. Move the guide rail to the desired position.

f. Insert the guide rail tabs into the mounting channel slots as shown.

g. Tap down on the guide rail to seat the tabs in the channel slots.

h. Replace the screw that secures the guide rail to the front guide mounting channel.

i. Repeat steps b through h for the left guide rail.

j. Return the tray to the merchandiser. See **INSTALLING A TRAY IN THE MERCHANDISER** (page 17).

k. Load products into the trays, and perform test vends. Make sure the trays don't interfere with the products you are vending, and that all products vend properly.
8. Installing a Tray in the Merchandiser

- Study this procedure before you install a tray for the first time; while you are holding the tray you will not be able to see this area. Proceed as follows:
  
a. Insert the tray so that the tray rollers pass over the tray guide rollers.

  ![Diagram of tray installation](157P0024)

  b. Bring the tray roller to rest on the tray guide.
  c. Tilt the tray upward.
  d. Connect the tray wiring harness to the PC board mounted to the guide rail JUST ABOVE the tray you are installing.

  ![Diagram of tray wiring](157P0026)

  e. Hold the tray up while pushing it toward the rear. Stop when the tab on the tray aligns with the opening in the tray guide.

  ![Diagram of tray alignment](157P0025)

  f. Lower the tray until it rests on the tray guide roller. Push the tray in all the way.
  g. The tray latch will fall into the locking position.
9. Installing and Removing a Product Spacer

INSTALLING A PRODUCT SPACER:
   a. Insert the product spacer mounting pins into the column divider as shown.

![Diagram of product spacer installation]

ADJUSTING A PRODUCT SPACER:
   a. With product loaded in the tray, rotate the product spacer up or down to keep the product upright as shown.

![Diagram of product spacer adjustment]

REMOVING A PRODUCT SPACER:
   a. Pull the product spacer mounting pins from the column divider.
The color of the spiral coupler (the little plastic tab attached to the rear of the spiral will tell you how many products will fit in the spiral. See table at left.

NOTE

Another way to determine spiral capacity is to count the spaces in the spiral!

1. Loading a Tray With Products In General:

   • See *PRODUCT PUSHER USAGE* (page 20) for spirals with capacity of 11, 13, or 15.

   • See *SPIRAL WALL RETAINER USAGE* (page 20) for spirals with capacity of 20, 25, 30, or 38.

   • Begin loading products at the front of the tray and work toward the back. Position the product so the package rests on the tray. DO NOT force a product into a spiral.

   • If the fit is too tight or too loose, change the spiral size. See *REMOVING AND INSTALLING SPIRALS* (page 11).

   • Be sure there are no empty positions between products in each spiral.

SPECIAL CONSIDERATIONS:

- Bagged Products - Position package upright, then push the tops slightly toward the rear of the tray. Also, see *PRODUCT PUSHER USAGE* (page 20).

- Thin Packages - Position the package upright. Also, see *SPIRAL WALL RETAINER USAGE* (page 20).

- KitKat - The two right-most columns of the candy tray are designed to accept the KitKat candy bar.

WARNING

This merchandiser does not have a health control circuit. It is not approved for the vending of perishable food items.
2. Spiral Wall Retainer Usage:
A spiral wall retainer serves to compress the spiral and make it act like a spring to more forcefully eject a product. Do some test vends and use a spiral wall retainer when a product does not readily leave the spiral.

- Use a spiral wall retainer in the following cases:
  - The spiral has a capacity of 20, 25, 30, or 38.
  - The product is thin.
  - The product is on a candy tray.

- The spiral wall retainer can also be used with other spirals and types of products.
- The spiral wall retainer is installed near the front of the column divider.
- There are two ways to install the spiral wall retainer.

<table>
<thead>
<tr>
<th>RETAINER ORIENTATION</th>
<th>A</th>
<th>B</th>
</tr>
</thead>
<tbody>
<tr>
<td>COLUMN DIVIDER</td>
<td>0 and 1</td>
<td>1 and 2</td>
</tr>
<tr>
<td>BETWEEN THESE POSITIONS</td>
<td>2 and 3</td>
<td>3 and 4</td>
</tr>
<tr>
<td></td>
<td>4 and 5</td>
<td>5 and 6</td>
</tr>
<tr>
<td></td>
<td>6 and 7</td>
<td>7 and 8</td>
</tr>
<tr>
<td></td>
<td>8 and 9</td>
<td></td>
</tr>
</tbody>
</table>

- To install a spiral wall retainer, insert the retainer in the square slot near the front of the column divider.

- The spiral wall retainer must be removed in two cases:
  - A Kit-Kat bar loaded into either of the two right hand positions of a tray will not clear the retainer on the column divider between the two positions.
  - A product pusher will catch on a retainer in ORIENTATION A.

3. Product Pusher Usage:
The product pusher will give the top of a product an extra tilt to help it fall into the delivery pan.

Use a product pusher in the following cases:
- The spiral has a capacity of 15, 13, or 11.
- The package is non-rigid like bagged peanuts

The product pusher can also be used with other spiral and types of products.

A bag of product pushers has been shipped with the merchandiser. Additional product pushers are available from the National Vendors’ parts department. To use a product pusher, snap it on the spiral as shown. You can adjust the product pusher by moving it around on the spiral to achieve the best vending results.
4. Preparing the Merchandiser for Vending "Lunch Bucket":

Because of the weight and shape of the package, National Vendors recommends that this product be vended only from the bottom tray.

To vend this product, two adjacent positions must be coupled together.

See *INSTALLING A GEAR* (page 14), for mechanical coupling directions, or see the *Programming Guide* for electrical coupling directions.

The left spiral coupler should be installed one position counterclockwise from the vertical position.

The right spiral coupler should be installed one position clockwise from the vertical position.

Replace the current spirals with six-count spirals. These are available from the National Vendors parts department. See *REMOVING AND INSTALLING SPIRALS* (page 11).

A pad can be installed in the bottom of the delivery pan to quiet and cushion product delivery. This part is available from the National Vendors parts department.

Load "Lunch Bucket" products as shown.
5. Preparing the Merchandiser for Vending "Top Shelf":

National Vendors recommends that "Top Shelf" product be vended from a candy tray.

Move the tray so the package can be loaded standing on its left or right edge. See MOVING A TRAY UP OR DOWN (page 16).

The following steps must be completed for three adjacent positions on the tray:

**NOTE**
The left-most position in the group of three must be an even numbered position.

1. REMOVE COLUMN DIVIDERS
2. REMOVE SPIRALS
3. LEAVE THIS MOTOR CONNECTOR ALONE
4. DISCONNECT THIS MOTOR CONNECTOR
5. MOVE CONNECTOR FROM THIS MOTOR
6. TO THIS MOTOR
7. INSTALL AN 11-COUNT LEFT HAND SPIRAL IN THIS POSITION
8. INSTALL AN 11-COUNT RIGHT-HAND SPIRAL IN THIS POSITION

Couple the left motor to the right motor. See the Programming Guide.

Load the "Top Shelf" products as shown.

Correct Loading Of "Top Shelf"
Return the Trays to the Vending Position

a. Lift the tray until it is parallel to the floor as shown.

b. Push the tray toward the back of the cabinet. The tray latches on the sides of the tray will lock into position.
Install and Set Price Labels

- Price rolls are printed on coiled-up strips as shown in this example. (The dollar and cents rolls are factory installed.) If you use another type of currency, you will find the appropriate price rolls in the plastic bag that contained this manual.

- There are two types of price rolls installed:
  - Dollar roll - 1 to 12, increments of 1
  - Cents roll - 00 to 95, increments of 05

- Remove the price rolls as required, and install the appropriate one(s) for your currency.

1. Installing Price Labels:
   - There are three pairs of slots in the front of the tray for each position. Install per this example:
     a. Insert the dollar roll in the left-most pair of slots as shown if the price is $1.00 or more.
     b. Insert the cents roll in the center pair of slots as shown.
     c. The low-number end of the roll goes in the top slot and the high-number end of the roll goes in the bottom slot.

2. Adjusting the price roll:
   You can set selection prices within the following range:
   - Minimum price $0.00
   - Maximum price $12.95
   - Increment $0.05

   a. Use your thumb as shown to move each price roll up or down as needed to set the desired price.

   **NOTE**
   You will see the word STOP near either end of the roll.
Selection ID numbers are printed on clear plastic sheets. You will find these in the plastic bag that contained this manual. You will need to separate them along the scored lines between the selections. BE CAREFUL when doing this, because it is easy to split the labels.

1. Installing Selection ID Numbers:
   a. Press together the two long edges of the selection ID label.
   b. Snap the selection ID label into position on the front of the tray as shown.
2. Which ID Label Goes With Which Selection?

See the figures below for snack and candy tray positions.

![Candy Tray ID Label](image2)
Refrigeration Module

1. Connect a Refrigeration Module to an External Drain (Optional)
   a. Connect a drain tube to the condensate pan.
   b. Route the drain tube to an external drain or to an overflow bucket.

2. Adjust the Air Discharge and Return Vents:
   The air discharge vents are located in the right side wall. The vents are adjusted by loosening the screw and sliding the air duct shutter up or down as required. With the shutter all the way down, the vent is fully open. The vent is closed when the shutter is all the way up. Ideally, the temperature at the top tray should be the same as that at the bottom tray. Using a thermometer to monitor temperature, adjust the air discharge and return vents until the temperatures are as close together as possible.

   **CAUTION**
   
   Do not close off all discharge vents. Doing so can damage the refrigeration unit.
Model 721/722 Setup and Operation Manual

1. Install the Lock Cylinder:
   Install an optional lock cylinder in the merchandiser as follows:
   a. Position the lift handle lock lever as shown.
   b. Depress the lock spring at the square hole of the lock cylinder receptacle and pull the lock springs out through the front.
   c. Position the lock cylinder as shown. Depress the spring loaded lock pin.
   d. Push the cylinder into the cylinder receptacle in the lever. The pin should snap into the square hole.
   e. If the cylinder pin does not seat in the square hole, press against both ends of the lock cylinder. Rotate the cylinder until the pin snaps into place.
   f. Leaving the door open, test the lock mechanism with a key.

2. Install the Optional Cash Box Lock:
   a. Remove the cash box from the merchandiser.
   b. Assemble the lock as shown in the illustration to the right.
   c. Return the cash box to the merchandiser.

3. Load the Coin Mechanism:
   a. Open the cabinet door.
   b. Open the monetary door.
   c. Insert coins one at a time until each of the coin tubes has been filled.
   d. Inspect the tubes for shingled coins and correct if necessary.
1. **Set Prices**

   a. Press \( \text{Price} \). The display shows \( **2.50, 0.25** \). This display shows the maximum and minimum prices set in the machine. In this example, the maximum price is $2.50 and the minimum is $0.25.

   b. Press the number of the selection to be priced. (Example: B1.) The display shows \( B1 \ X.XX \). Enter a price using the number keys. The selection is now priced.

   c. Press another letter key, or \( \text{Price} \) to price another selection.
Model 721/722 Setup and Operation Manual

2. View the Cabinet Temperature

a. Press F1. Depending on how your machine is configured, the display will show, for example, TEMP 66 °F. This example shows that the temperature is 66 degrees Fahrenheit.

b. If you need to change the cabinet temperature setting, refer to your Programming Manual.

c. To change the display units, press EDIT. The display now shows TEMP 19 °C.

d. An I replacing the F or C means a sensor error exists and the displayed temperature is invalid. A decimal point in the display means the compressor is running; an apostrophe means the heater is on.

   NOTE
   When the machine door is closed, you can view the temperature by pressing X on the selection panel.

e. Press Exit until you have left the function.
Now, you have connected your merchandiser to the utilities, placed it in its final location, loaded it with products, and set the prices. Before you lock the door and move on, you should check to see if your merchandiser will vend products. In case of problems, perform the operational readiness checks beginning on the next page.

1. **Test Vend Selections**
   a. Press \( \text{TEST} \). The display shows \( \text{TEST .00} \). You may now test vend selections. If you insert money into the machine, the zeros in the display will be replaced with the amount of the credit. After the item vends, your money will be returned.
   You may make one more test vend if you close the door while still in TEST VEND mode.
   b. Press \( \text{Exit} \) until you have left the function.

2. **Operational Readiness Check**
   a. Perform test vends on all selections.
   b. Do any of the snack or candy products catch on the tray and fail to vend? If not, skip to step c. If so, perform the following procedures on the affected areas until all products vend properly:
      1. Install and/or adjust a product spacer.
      2. Install a product pusher.
      3. Install and/or remove spiral wall retainers.
      4. Perform the appropriate spiral anti-hang-up procedure(s) (see below).
   c. Test the operation of the coin mechanism (see the *Programming Guide* for the proper procedure.).
   d. Test the operation of the bill validator.
   e. Return all test vended products to the trays.
3. **Spiral Indexing Procedure (One Spiral, One Motor)**

The spiral indexing procedures involve rotating spirals one position at a time until the product vends properly.

a. Home all the motors (see the *Programming Guide*).
b. Remove the affected spiral.
c. Is the coupler in the proper position?
   - **NO** - Move the coupler to the position as shown in *INSTALLING A SPIRAL COUPLER* (page 15). Go to step d.
   - **YES** - Move the coupler to the next clockwise position (if it's on a right-hand motor), or the next counterclockwise position (if it's on a left-hand motor). Go to step d.
d. Replace the spiral.
e. Perform a test vend (see page 31).
f. Did the product hang up?
   - **NO** - You're finished. Continue to test vend the remaining selections until everything works right.
   - **YES** - Go to step g.
g. Did you previously move the coupler to the next clockwise or counterclockwise position?
   - **NO** - Move the coupler to the next clockwise position (if it's on a right-hand motor), or the next counterclockwise position (if it's on a left-hand motor). Return to step 6.
   - **YES** - Return to step b in the operational readiness check (see page 31) and try another procedure. Do not move the coupler again.
4. Spiral Indexing Procedure (Two Spirals, One Or Two Motors)

The spiral indexing procedures involve rotating spirals one position at a time until the product vends properly.

a. Home all the motors (see the Programming Guide).
b. Remove the left hand spiral of the affected pair.
c. Is the coupler in the proper position?
   NO - Move the coupler to the position as shown in INSTALLING A SPIRAL COUPLER (page 15). Go to step d.
   YES - Move the left coupler to the next counterclockwise position. Go to step d.
d. Replace the left hand spiral.
e. Remove the right hand spiral, spiral coupler, and gear (if used) of the affected pair as a unit.
f. Rotate this unit until the right hand spiral mirrors the position of the left hand spiral.
g. Replace the right hand spiral, spiral coupler, and gear (if used).
h. Perform a test vend (see page 31).
i. Did the product hang up?
   NO - You're finished. Continue to test vend the remaining selections until everything works right.
   YES - Go to step j.

j. Did you previously move the left hand coupler to the next counterclockwise position?
   NO - Remove the left hand spiral of the affected pair. Turn the left spiral coupler to the next counterclockwise position. Return to step 4.
   YES - Return to step b in the operational readiness check (see page 31) and try another procedure. Do not move the coupler again.

5. Testing the Bill Validator

a. Insert a $1 bill into the validator.
b. Push the coin return button.
   THE BILL VALIDATOR IS IN THE ESCROW MODE - No money is returned - you must make a selection in order to receive any change. Go to step c.
   THE BILL VALIDATOR IS NOT IN THE ESCROW MODE - You should receive four quarters in change. Go to step c.
c. Make a selection. The correct selection should be vended and correct change should be returned.
This Merchandiser is warranted for one (1) year against defective parts and workmanship. Any part or parts which are proven to be defective within one (1) year of the date of shipment will be repaired or replaced free of charge when the defective part is returned, with transportation charges prepaid, to the destination designated by the National Vendors Warranty Department.

This warranty applies only to the original purchaser of the Merchandiser and is null and void if the Merchandiser is sold during the period of warranty.

This warranty does not apply to a) electrical components, wiring, or circuits and/or for all mechanical parts or assemblies damaged as a result of operating the Merchandiser at other than the design voltage and frequency specified on the Electrical Rating Tag, or b) in event of vandalism, fire or negligence, or c) incandescent lamps, neon lamps, fluorescent lamps, ballasts, starters or other expendable items or d) when other manufactured components are installed in National Vendors Merchandisers.

National Vendors is not responsible for any cost of service rendered or repairs made by customer or its agents on Merchandiser or parts unless authorization to incur such expense has been given in writing by National Vendors prior to incurring such expense.

THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES EXPRESSED OR IMPLIED, INCLUDING WITHOUT LIMITATION, WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. NATIONAL VENDORS SHALL NOT BE RESPONSIBLE FOR CONSEQUENTIAL OR PUNITIVE DAMAGES. National Vendors neither assumes nor authorizes any person to assume for it any obligation or liability in connection with the sale of said equipment or any part thereof.
